SUMMARY: NRC previously announced in the **Federal Register** (62 FR 49264, September 19, 1997) that it is holding a public workshop in Rockville, Maryland to receive input from licensees and the public on a working paper on "License Termination Under Restricted Conditions" being developed as a section of an upcoming Regulatory Guide. NRC also announced in that FR that the workshop would be video-conferenced at other locations and indicated that further information on those locations would be made available. The locations that will be used for the video-conferencing are NRC's Region II Offices in Atlanta Georgia, and NRC's Region III Offices in Lisle, Illinois. All interested licensees and members of the public are invited to attend the workshop at the Rockville location or either of the two video-conferencing locations.

DATES: The workshop will be held in Rockville, Maryland on October 15, 1997, beginning at 9 a.m. and ending at about 5 p.m (EDT).

Video-conferencing of the workshop will be available in NRC's Region II Office in Atlanta, Georgia from 9 a.m. through 12 noon (EDT); audio capabilities will be available from 1 p.m. through 5 p.m.

SUPPLEMENTARY INFORMATION: This workshop is one of a series of interactions with the Agreement States, licensees, and the public to gather suggestions and ideas to ensure the success in developing a Regulatory Guide on "Demonstrating Compliance With the Radiological Criteria for License Termination." The workshop will begin with a brief introduction on some of the more important questions that were considered in developing the Regulatory Guide working paper on "License Termination under Restricted Conditions." After the introduction, the Working Paper will be reviewed section-by-section. Attendees will be asked for questions and comments on each section. The NRC will ask questions on

the approach that it has developed. Written comments that have been received from the public will be discussed.

Participants at the two regional locations will be able to ask questions and provide comments through a moderator both during the periods that the workshop is available through video-conferencing and through audio connection.

There is no visitor parking at Region II in the Atlanta Federal Center (AFC) building. There are several hourly parking lots located near the AFC (behind the AFC tower and on the corner of Forsyth Street and Martin Luther King, Jr. Drive). The AFC is located near the Five Point Station on the MARTA train line. There are two locations for visitor parking at Region III. A visitor parking lot is located on the north end of the building (between the office building and Warrenton Road), and a parking garage is located on the west side of the building (visitors can park on the street level or upper level). Seating for the public at each location will be on a first-come, first-served basis.

A transcript of this workshop will be available for inspection, and copying for a fee at the NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC 20555, on or about October 31, 1997.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-361 and 50-362]

Southern California Edison Company, et al. San Onofre Nuclear Generating Station; Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by letter dated June 23, 1997, Patricia Borchmann (Petitioner) requested that in accordance with 10 CFR 2.206, the U.S. Nuclear Regulatory Commission (Commission or NRC) not allow San Onofre Nuclear Generating Station (SONGS) Unit 3 to restart from its current refueling outage until her concerns were fully resolved. This letter was supplemented by letters dated June 28 and July 11, 1997, in which the Petitioner requested the staff to take the same action for SONGS Unit 2. On July 8, 1997, the NRC verbally notified the petitioner that the issues discussed in the submittals did not contain enough information to warrant the NRC taking action to prevent the SONGS units from restarting. By NRC letter dated September 22, 1997, the NRC denied the Petitioner's requests that the NRC take immediate action to not allow SONGS Units 2 and 3 to restart.

The Petitioner's letters contained a variety of issues in support of the requested actions, which the staff grouped into three categories for the purpose of evaluating the request for immediate action. These categories are fully described in the NRC's letter of September 22, 1997, denying the Petitioner's request.

As a result of its evaluation detailed in its letter of September 22, 1997, the NRC staff found that there was insufficient basis to warrant the immediate action requested to prevent SONGS Units 2 and 3 from restarting. Therefore, the request for immediate action was denied. As provided by 10 CFR 2.206, appropriate action will be taken with regard to the concerns raised by the Petitioner within a reasonable time.

A copy of the Petition is available for inspection in the Commission's Public

Document Room at 2120 L Street, NW, Washington, DC 20555-0001, and the Local Public Document Room at the Main Library, University of California, P.O. Box 19557, Irvine, CA 92713.

Dated at Rockville, Maryland, this 22nd day of September 1997.

For The Nuclear Regulatory Commission.

Director, Office of Nuclear Reactor Regulation.
