NATIONAL CREDIT UNION ADMINISTRATION

Notice of Previously Held Emergency Meeting

Time and Date: 2:13 p.m., Monday,
November 17, 1997.

Place: Board Room, 7th Floor, Room
7047, 1775 Duke Street, Alexandria,
Virginia 22314-3428.

Status: Closed.

Matter Considered: 1. Matters Relating
to OPM Report. Closed pursuant to
exemptions (2) and (6).

The Board voted unanimously that
Agency business required that a meeting
be held with less than the usual seven
days advance notice, that it be closed to
the public, and that earlier
announcement of this was not possible.

The Board voted unanimously to
close the meeting under the exemptions
stated above. General Counsel Robert
Fenner certified that the meeting could
be closed under those exemptions.

NUCLEAR REGULATORY COMMISSION

Management of Radioactive Material Safety Programs at Medical Facilities: Availability of NUREG

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: The U. S. Nuclear Regulatory Commission is announcing the availability of NUREG-1516:

"Management of Radioactive Material Safety Programs at Medical Facilities," dated May 1997.

ADDRESSES: Copies of NUREG-1516 may be obtained by writing to the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20402-9328. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. A copy of the document is also available for inspection and/or copying for a fee in the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555-0001.

FOR FURTHER INFORMATION CONTACT: Susanne Woods, Mail Stop TWFN 8-F5, Division of Industrial and Medical Nuclear Safety, Office of Nuclear

Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: (301) 415-7267.

DESCRIPTION AND SUPPLEMENTARY INFORMATION: On February 13, 1995 (60 FR 8259), NRC announced the availability of Draft NUREG-1516: "Management of Radioactive Material Safety Programs at Medical Facilities," dated January 1995, and requested comments on the document. During preparation of the final NUREG report, the staff considered all the comments, to improve the document.

The final version of NUREG-1516 is now available for use by license applicants, licensees, and NRC staff. The report represents the collective work of a number of staff, with input from two representatives from Agreement States. During various stages of development, the authors received additional input from professional organizations and the Agreement States through presentation and peer review.

NUREG-1516 represents guidance on mechanisms and tools for managing radiation safety programs at medical facilities licensed by either NRC or Agreement States. The guidance describes a systematic approach for effectively managing radiation safety programs by defining the roles of an institution's executive management, radiation safety officer (RSO), and radiation safety committee, if required. Various aspects of program management are discussed and guidance is offered in the following areas: selecting an RSO; determining adequate program resources; using contractual services such as consultants and service companies; conducting program audits; and clarifying the roles of both physician authorized users and supervised individuals.

Current NRC reporting and notification requirements are outlined and a general description is given for how NRC licensing, inspection, and enforcement programs are presently conducted. The NUREG does not describe new or proposed regulations, and licensees are not required to adhere to the principles presented in the document. Rather, this should be viewed as a practical guide to present a management approach and describe management tools that regulatory agencies have observed to be effective for managing a radiation safety program at a medical facility, using current regulatory requirements. The radiation safety principles and practices in NUREG-1516 are specifically directed toward the safe use of byproduct radioactive material; however, the

universal applicability of these principles and practices may be helpful to individuals, managing the safe uses of radiation in medicine, who are not mentioned in the NUREG.

Small Business and Regulatory Enforcement Fairness Act

In accordance with the Small Business and Regulatory Enforcement Fairness Act of 1996, the NRC has determined that this action is not a major rule and has verified this determination with the Office of Information and Regulatory Affairs of the Office of Management and Budget.

Dated at Rockville, Maryland, this 12th day of November, 1997.

For the Nuclear Regulatory Commission.

Larry W. Camper,

Chief, Medical, Academic and Commercial Use Safety Branch, Division of Industrial and Medical Nuclear Safety, Office of Nuclear Material Safety and Safeguards.
