Streamlining Software Aspects of Certification Industry Workshop

AGENCY: Federal Aviation Administration.

ACTION: Notice of Industry Workshop.

SUMMARY:

Background

In April 1997, the Federal Aviation Administration (FAA) initiated the Streamlining Software Aspects of Certification (SSAC) program. The overall goal of this program is to reduce

the cost and time of certifying systems with software while maintaining or increasing system safety.

The purpose of this program is: (1) to determine scientifically if the time/expense burden yields the safety benefits; (2) to recommend improvements; and (3) to prototype those improvements.

The FAA assembled a team of experts to accomplish this purpose. The team is led by NASA Langley Research Center and includes software experts Dr. Nancy Leveson and Dr. John Knight.

Workshop Announcement

On January 7-8, 1998, an SSAC Industry Workshop will be held starting at 8:30 am. The workshop will be held at TRW Government Information Services Division at One Federal Systems Park Drive (Building FP1) in Fairfax, Virginia. The purpose of the SSAC Workshop is to enable the FAA and the SSAC research team to listen to industry's concerns about the software aspects of the certification process. The FAA is seeking industry participants who can relate their concerns through experience and involvement in the system certification process.

During the workshop, the SSAC team seeks input about: (1) the impact of DO-178B on each organization; (2) experiences with certification authorities; and (3) issues with the certification process believed to add cost and delay without affecting the quality of safety.

Upon conclusion of the workshop, the FAA will follow up by researching the issues voiced by industry, providing feedback, and sharing the results of this research effort. The key to the success of the workshop and the success of the SSAC program depends upon industry participation, input, and support.

Attendance is open to the appropriate industry participants. Persons wishing to receive additional information should contact the SSAC Assistant Program Manager, Bonnie Danner: TRW Government Information Services Division; One Federal System Park Drive; Fairfax, VA 22033-4416; 202-651-2254 (phone); or 202-484-1255 (fax).

Issued in Washington, DC on November 24, 1997.

Abbas Rizvi,

Acting Manager, Aircraft Engineering Division, Aircraft Certification Service.
