

For the off-site strategy, emphasis will be placed on evaluating the impacts and identifying mitigation measures associated with the potential transport of non-stockpile CWM, as the impacts and mitigation measures for the treatment of non-stockpile CWM would be the same as those to be identified under the on-site strategy. The off-site strategy will indicate that, under current law, non-stockpile CWM can only be transported in state or to the nearest chemical munitions stockpile storage facility that has the necessary permits for receiving and storing them. For the no action strategy, the potential adverse impacts and mitigation measures to be emphasized will be those associated with storage of non-stockpile CWM.

The Draft PEIS will be made available for public review and comment. Its availability will be announced, written comments on the Draft will be solicited, and information about a possible public meeting to comment on the Draft will be published at a later date. The Army expects to release the Draft PEIS in late 1998 and the Final PEIS by early 2000.

Dated: December 4, 1997.

Raymond J. Fatz,

*Deputy Assistant Secretary of the Army
(Environment, Safety and Occupational
Health) OASA (I,L&E).*
