

final rule do not impose an additional burden since the members will be complying with the current organizations' standards which are comparable to the requirements in the final rule. To account for persons or establishments that may not be a member of an industry organization and, for whom therefore, the extent of

compliance with the requirements of the final rule is unknown, FDA will be using 1 percent as an estimation of the information collection burden on the tissue industry.

Industry estimates that in 1994 there were 350,000 bone transplants, 42,000 corneal transplants, 5,000 patellar tendon transplants, and the

transplantation of 5,000 square feet of skin. There are approximately 300 persons and 170 tissue banks currently operating in the United States affected by the regulations.

The total annual estimated burden imposed by this collection of information is 32,260 hours annually.
