

compliance monitoring program to be implemented when selected controls are completed. OMB's approval of the initial ICR for the CSO Control Policy recommended that the renewal ICR include EPA's best estimate of the burden associated with a reasonable and targeted compliance monitoring program.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments on its ICR amendment. Specifically, we would like comments to help us to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond.

**Burden Statement:** The estimated burden reflected in this ICR is 1,861,528 hours and a cost of \$58,737,887.

Of this total, the portion for municipalities with combined sewer systems is 1,774,319 hours at a cost of \$55,975,099, including start-up costs of \$180,080 for the third party notification under the Nine Minimum Controls (NMC) in the CSO policy. The estimated burden on each of 238 municipalities for DMR reporting and recordkeeping is 291 hours and \$9,219. The estimated burden on each of 570 municipalities for NMC reporting and long-term control plan development and submission is 2,978 hours and \$93,598 and for third-party notification, 24 hours and \$756.

The estimated burden for Federal and State governments is 8896.5 hours and \$281,844 and 78,312.5 hours and \$2,480,944, respectively. This includes the burden associated with reviewing the DMRs, the NMC documentations, and the long-term control plans submitted by the respondents and reissuing NPDES permits or issuing other enforceable mechanisms to municipalities with CSSs to implement the CSO Control Policy. The annual

average burden for Federal and State review of DMRs, NMC documentations, and long-term control plans is 2,445.5 hours and \$77,475 and 21,157.5 hours and \$670,271, respectively. The annual average burden associated with reissuing NPDES permits or issuing other enforceable mechanisms to CSO municipalities is 520 hours and \$16,474 for the Federal government and 4,547 hours and \$144,039 for State governments.

The estimated burden on the States to report summary information to EPA for oversight of the EPA's CSO Control Policy and for GPRA purposes is 1,200 hours and \$38,016.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
