

when the tidal prism is reduced to 25 mcf.

### 9. Sedimentation History.

Over the last 150 years, much of the lagoon's richest subtidal and intertidal habitat has been lost through sedimentation. There is a growing concern about the long-term health of the lagoon. Past human impacts on the lagoon contributing to the subtidal and intertidal habitat reduction include poor watershed management practices such as logging, fires, agriculture, and grazing. This has resulted in higher than normal sediment loads conveyed into the lagoon. Other factors that may increase sedimentation include placement of fill in the lagoon and the diversion and manipulation of watercourses entering the lagoon and material entering the lagoon through the ocean entrance. It is estimated that from 1968 to 1988 Bolinas Lagoon lost 40% of its subtidal habitat as it was converted to emergent marsh and uplands.

### 10. 1906 Earthquake

The biggest historic change in tidal prism occurred during the 1906 earthquake, when Bolinas Lagoon subsided one foot over most of its area, increasing the tidal prism by about 50 mcf.

### 11. Ecosystem Restoration Goal

The goal of ecosystem restoration work performed at Bolinas Lagoon is to restore intertidal and subtidal habitat and stop further loss of these habitats through restoring tidal prism and improving circulation within the basin, while maintaining key mudflats, marsh vegetation, and other areas of biological importance.

### 12. Feasibility Study

The five-phase Feasibility Study will identify and evaluate measures to restore lost tidal prism and reduce the rate of sedimentation as follows:

#### *a. Define existing conditions and Formulate Alternatives*

Phase One will investigate existing physical and environmental conditions restoration needs and constraints of the area. The future without-project conditions in the study area will be projected. Input on the ecosystem will be sought from resource agencies and the public. Public scoping workshops will be held both at the Marin Civic Center and the Stinson Beach Community Center.

#### *b. Alternative Development*

During Phase Two, tidal hydraulic modeling of the preliminary alternatives will be completed and economics and environmental impacts studied.

#### *c. Detailed Evaluation*

In Phase Three, preliminary alternatives will be evaluated and environmental benefits of the ecosystem restoration alternatives will be qualified. A draft Fish and Wildlife Coordination Act Report including a Habitat Evaluation Procedure (HEP) will be prepared to help provide the basis for identifying the most cost-effective alternative acceptable to the agencies and community.

#### *d. Draft Report Preparation*

Phase Four involves preparing the draft Feasibility Report and Environmental Impact Statement/Report (EIS/R). The EIS/R will analyze all reasonable alternatives and evaluate compliance with federal and state environmental requirements. A formal public review and comment period will be started.

#### *e. Final Report Preparation*

The last phase of the study includes preparing the final Feasibility Report recommending a preferred alternative and completing the final EIS/R which will respond to all comments on the draft EIS/R. The feasibility study will conclude with the issue of the Division Engineer's Notice. Construction would follow.

### 13. Workshop/Scoping

Two Workshop/Scoping meetings will be held on Thursday April 16. The first is intended mainly for local, state, and federal agencies and organizations. The second is all interested parties.

Workshop/Scoping meeting locations:  
9:00–12:00 Green Room, Marin Veterans' Memorial Auditorium, Marin Civic Center, San Rafael, CA  
6:30–9:30 Stinson Beach Community Center, Stinson Beach, CA

**SUPPLEMENTARY INFORMATION:** Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Deputy Chief Information Officer, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the
