BILLING CODE 3510-22-F

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**50 CFR Part 648**

[Docket No. 971015246-7293-02; I.D. 041398A]

**Fisheries of the Northeastern United States; Summer Flounder and Scup Fisheries; Readjustments to 1998 Quotas; Commercial Summer Period Scup Quota Harvested for Maryland**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Commercial quota adjustment, notice of commercial quota harvest.

**SUMMARY:** NMFS issues this notification announcing adjustments to the 1998 summer flounder commercial state quotas and the 1998 scup Summer period state quotas. This action complies with regulations implementing the Fishery Management Plan for the Summer Flounder, Scup, and Black Sea Bass Fisheries (FMP), which require that landings in excess of a state's annual summer flounder commercial quota and Summer period scup commercial quota be deducted from a state's respective quota the following year. The public is

advised that quota adjustments have been made, and is informed of the revised quotas for the affected states.

**DATES:** Effective April 23, 1998, through December 31, 1998.

**FOR FURTHER INFORMATION CONTACT:**

Regina L. Spallone, Fishery Policy Analyst, 978-281-9221.

**SUPPLEMENTARY INFORMATION:**

**Summer Flounder**

Regulations implementing summer flounder management measures are found at 50 CFR part 648, subparts A and G. The regulations require annual specification of a commercial quota that is apportioned among the Atlantic coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state are described in § 648.100. The final specifications for the 1998 summer flounder fishery, adopted to ensure achievement of a fishing mortality rate (F) of 0.24 for 1998, set a commercial quota equal to 11,105,636 lb (5.0 million kg) (62 FR 66304, December 18, 1997).

Section 648.100(d)(2) provides that all landings for sale in a state shall be applied against that state's annual commercial quota. Any landings in excess of the state's quota must be deducted from that state's annual quota for the following year. NMFS published a preliminary adjustment to the states' annual quotas on January 23, 1998 (63 FR 3478), that deducted for state overages in the 1997 fishery. When those data were presented, NMFS noted that the data used in making the adjustments were preliminary, and if additional data became available that altered the figures, an additional adjustment would be necessary. Since that time, additional data have been submitted by state fisheries agencies and federally permitted dealers who submitted late reports. Additional landings were reported as the result of

NMFS Law Enforcement investigations. Further Law Enforcement investigations are ongoing and a resulting quota adjustment from those investigations will be published if necessary.

Based on dealer reports and other available information, NMFS has determined that the States of Maine, Massachusetts, Connecticut, New York, Delaware, Maryland, Virginia, and North Carolina exceeded their 1997 quotas. The remaining States of New Jersey, Rhode Island, and New Hampshire did not exceed their 1997 quotas. This finding differs from that noted in the notice of preliminary quota adjustment, published on January 23, 1998 (63 FR 3478). At that time, Connecticut and Virginia did not appear to have exceeded their 1997 quotas.

The final 1997 landings and overages for all states and how those landings compare with the 1997 landings originally reported in the January notice are given in Table 1. This table illustrates that, in the following states, the revised 1997 landings resulted in additional overage to a state's quota: Massachusetts, New York, Delaware, Maryland, and North Carolina. There was no change to the data reported in Maine and New Hampshire. In the State of Rhode Island, revised landings are fewer than what were originally reported. The State of New Jersey showed additional landings, but those data still did not result in an overage for that State. Based on the revised data, the State of Connecticut and the Commonwealth of Virginia changed from a no-overage status to an overage. The revised 1998 commercial summer flounder quota for each state is given in Table 2. While this action adjusts the final quotas allocated to the states, it does not alter the notification of commercial quota harvest in the State of Delaware as indicated in that January notice.

**Scup**

Regulations implementing scup management measures are found at 50 CFR part 648, subparts A and H. The regulations require annual specification of a commercial quota that is allocated into three periods: Winter I, Summer, and Winter II. During Winter I and Winter II periods, the commercial quota is distributed to the coastal states from Maine through North Carolina on a

coastwide basis. During the Summer period, the commercial quota is apportioned among the Atlantic coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state during the Summer period is described in § 648.120. The final specifications for the 1998 scup fishery, adopted to ensure achievement in 1998 of a target

exploitation rate of 47 percent, the rate associated with F=0.72, set a commercial quota equal to 4,572,000 lb (2.07 million kg) (62 FR 66304, December 18, 1997).

The 1997 Winter I and Winter II period landings are shown in Table 3.—Landings did not exceed the allowable quota for either period. Therefore, no deductions from those periods are necessary.

TABLE 3. FINAL 1997 WINTER PERIOD COMMERCIAL SCUP LANDINGS

Period	1997 quota		1997 landings		1997 overage	
	Lb	(Kg)	Lb	(Kg)	Lb	(Kg)
Winter I .....	2,706,000	1,227,693	2,046,701	928,368	0	0
Winter II .....	956,400	433,816	569,412	258,281	0	0

Section 648.120(d)(4) provides that all scup landed for sale in a state during the Summer period shall be applied against that state's summer commercial quota, regardless of where the scup were harvested. Section 648.120(d)(6) provides that any overages of the commercial quota landed in any state

during the Summer period will be deducted from that state's Summer period quota for the following year. When the data were presented in the January notice, NMFS noted that the data used in making the adjustments were preliminary, and, if additional data became available that altered the

figures, an additional adjustment would be necessary. Since that time, additional data have been submitted by state fisheries agencies and federally permitted dealers who submitted late reports.

Based on dealer reports and other available information, NMFS has

determined that the States of Massachusetts, Delaware, and Maryland have exceeded their 1997 Summer period quota for scup. The remaining States of Maine, Rhode Island, Connecticut, New York, New Jersey, Virginia, and North Carolina did not exceed their 1997 Summer period quotas. This finding differs from that noted in the notice of preliminary quota adjustment. At that time, Delaware and Maryland did not appear to have exceeded their 1997 Summer period quotas. But Massachusetts and North Carolina appeared to have exceeded theirs.

The revised 1997 Summer period landings for all states and how those landings compare with the 1997 landings originally reported in the January notice are given in Table 4. This table illustrates that, in the States of Massachusetts, Delaware, and Maryland, the revised 1997 landings resulted in overage or additional overage to a state's quota. There was no change to the data reported in Maine and New Hampshire. In the States of Rhode Island and North Carolina, the revised landings are less than what was originally reported. The States of Connecticut, New York, New Jersey, and Virginia showed additional landings,

but those data did not result in overages for those States.

The revised 1998 commercial Summer period scup quota for each state is given in Table 5. While this action adjusts the final Summer period quotas allocated to the states, it does not alter the notification of commercial quota harvest in the Commonwealth of Massachusetts as indicated in that January notice or in the State of Delaware as indicated in the final specifications. However, this notice does eliminate the overage and subsequent reduction of Summer period quota in the State of North Carolina.

Section 648.121(b) requires the Administrator, Northeast Region, NMFS (Regional Administrator) to monitor the Summer period state commercial quotas and to determine the date when a state's commercial quota is harvested. NMFS is required to publish notification in the **Federal Register** advising a state and notifying vessel and dealer permit holders that, effective upon a specific date, a state's Summer period commercial scup quota has been harvested and that no Summer period commercial quota is available for landing scup for the remainder of the period.

Since this adjustment reduces the 1998 Maryland Summer period commercial quota allocation from 229 lb (104 kg) to -635 lb (-288 kg), this document also announces that the Summer period quota available to Maryland has been harvested and that no commercial quota is available for landings during the 1998 Summer period.

The regulations at § 648.4(b) provide that Federal scup commercial permit holders agree as a condition of the permit not to land scup in any state that the Regional Administrator has determined no longer has commercial quota available. Therefore, effective 0001 hours May 1, 1998, until 2400 hours, October 31, 1998, landings of scup in Maryland by vessels holding Federal commercial scup fisheries permits are prohibited, unless additional quota becomes available through a transfer and is announced in the **Federal Register**. Federally permitted dealers are also advised that they may not purchase scup from federally permitted scup vessels that land in Maryland for the Summer period or until additional quota becomes available through a transfer.
