

and actions that are similar to the Proposed Action, with the exception of the management direction proposed for livestock grazing and recreation. Under this alternative, three ACECs would be designated and managed to achieve the recovery of the desert tortoise through modifications to multiple use within those special management areas. Livestock grazing within the ACECs would be managed according to forage production criteria intended to meet the desert tortoise recovery objectives. Recreation management direction would also be modified to minimize conflicts with recovery efforts. Section 7 consultation would continue to be conducted with the USFWS on any federal action that might affect listed species.

Alternative B (DWMA Alternative) contains most of the management goals and prescriptions recommended in the Recovery Plan, with less emphasis on multiple use management of the public lands. Two special management areas, labeled Desert Wildlife Management Areas (DWMAs), would protect 52 percent of the desert tortoise designated critical habitat. The DWMAs would contain approximately 300,800 acres and would be managed primarily for the recovery of the desert tortoise. Management prescriptions would not authorize livestock grazing, mineral development, many land use authorizations, and some types of recreational activities within the DWMAs. No special management attention, other than required Section 7 consultation on federal actions that might affect listed species, would be directed to the approximately 454,000 acres of desert tortoise habitat outside of the DWMAs, unless the desert tortoise populations occupying that habitat were in jeopardy.

Alternative C (No Action Alternative) would continue management under the approved Caliente MFP. Management recommendations from the Recovery Plan either would not be implemented or would not be systematically or comprehensively implemented. Section 7 consultation with the USFWS would continue to be conducted prior to the authorization of any federal action affecting listed species. Management direction would also be provided through the issuance of Biological Opinions by the USFWS through Section 7 consultation. Current management directions for livestock grazing and off-highway vehicle events were developed as a result of Biological Opinions issued to minimize effects on desert tortoise habitat. The No Action Alternative forms the baseline against which to assess the effects of the

alternatives and is required for a comprehensive NEPA analysis.

A 60 Day Notice of Request for Extension of a Currently Approved Collection of Information; Opportunity for Public Comment was published in the **Federal Register** on February 11, 1997, Volume 62, #28, page 6266. No replies were received from the public as a result of the **Federal Register** Notice. Past NPS interviewer experiences show that park visitors have a positive interest in participating in the surveys and in volunteering information in response to the survey questions. Due to streamlining the scope of the survey, there has been a reduction in 700 burden hours from the previously approved survey and as was indicated in the February 11, 1997 **Federal Register** Notice.

ACTION: Notice and request for comments.

ABSTRACT: The National Park Service (NPS) Visitor Service Project and Mount Rushmore National Memorial propose to conduct visitor surveys to learn about visitor demographics and visitor opinions about services and facilities in Mount Rushmore National Memorial. The results of the surveys will be used by park managers to improve the service they provide to visitors while better protecting park natural and cultural resources. A study package that includes the proposed survey questionnaire for the proposed Mount Rushmore National Memorial study has been submitted to the Office of Management and Budget for review.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 and 5 CFR part 1320, Reporting and Record Keeping Requirements, the NPS invites public comment on the proposed information collection request (ICR). The purpose of the proposed ICR is to document the demographics of visitors to Mount Rushmore National Memorial, to learn about the motivations and expectations these visitors have for their park visit, and to obtain their opinions regarding services provided by the park and the suitability of the visitor facilities maintained in the park. This

information will be used by park planners and managers to plan, develop, and operate visitor services and facilities in ways that maximize use of limited park financial and personnel resources to meet the expectations and desires of park visitors.

There were no public comments received as a result of publishing in the **Federal Register** a 60 day notice of intention to request clearance of information collection for this survey.
