Availability of Draft Recovery Plan for the Arroyo Southwestern Toad for Review and Comment

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a draft Recovery Plan for the Arroyo Southwestern Toad. This toad occurs in coastal montane regions from Monterey County, California, to Baja California.

**DATE:** Comments received on the draft recovery plan by August 4, 1998, will be considered by the Service.

ADDRESSES: Copies of the draft recovery plan are available for inspection, by appointment, during normal business hours at the following locations: U.S. Fish and Wildlife Service, 2493 Portola Road, Suite B, Ventura, California 93003 (phone: 805/644–1766); U.S. Fish and Wildlife Service, 2730 Loker Avenue West, Carlsbad, California 92008 (phone: 760/431–9440). Requests for copies of the draft recovery plan and written comments and materials regarding this plan should be addressed to the Field Supervisor, at the above Ventura address.

FOR FURTHER INFORMATION CONTACT: Dr. Grace S. McLaughlin, Herpetologist, at the Ventura address.

## SUPPLEMENTARY INFORMATION:

# **Background**

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act, as amended (16 U.S.C. 1531 et seq.) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in 1988 requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during the public comment period prior to approval of each new or revised Recovery Plan. Substantive technical comments will result in changes to the plans. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plans, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions. Individualized responses to comments will not be provided.

This species is listed as endangered. As of 1994, the arroyo southwestern toad (*Bufo microscaphus californicus*) (referred to as arroyo toad) was known

from 22 river basins with a total estimated breeding population of fewer than 3,000 individuals. The arroyo toad is endemic to primarily the coastal plain and mountains of central and southern California and northwestern Baja California. These toads breed in stream channels and use stream terraces and surrounding uplands for foraging and wintering. Direct habitat loss due to urbanization, agriculture, and dam construction is the main cause for the decline of arroyo toads. Other threats include water diversions, road building, livestock grazing, mining, recreational activities, loss of habitat due to exotic plants, and predation by introduced species. Although the species evolved and has survived in an environment periodically impacted by fire, flood, and drought, the interactions of such natural events with human alterations of the habitat may lead to the extirpation of local populations.

The objective of this plan is to provide a framework for the recovery of the arroyo toad so that protection by the Act is no longer necessary. The recovery strategy for the arroyo toad is focused on providing sufficient breeding and upland habitat to maintain selfsustaining populations of arroyo toads throughout the historic range of the species in California, and minimizing or eliminating impacts and threats to arroyo toad populations. This plan describes a five-part recovery strategy with specific tasks necessary to maintain healthy aquatic, riparian and adjacent upland ecosystems that provide habitat for arroyo toads. The tasks, when implemented, will stabilize and maintain populations throughout the range of the arroyo toad in California by protecting sufficient breeding and nonbreeding habitat, monitor the status of existing populations to ensure

recovery actions are successful, identify and secure additional suitable arroyo toad habitat and populations, conduct research to determine the population dynamics and ecology of the species to guide management efforts and determine the best methods for reducing threats, and develop and implement an outreach program.

## **Public Comments Solicited**

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of this plan.

## **Authority**

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Notice of Availability of a Draft Recovery Plan for the Least Bell's vireo (Vireo bellii pusillus) for Review and Comment

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a draft recovery plan for the least Bell's vireo (Vireo bellii pusillus). The breeding distribution of the least Bell's vireo is limited to eight counties in southern California and portions of northern Baja California, Mexico. Historically, this species was widespread throughout riparian woodlands in the Central Valley and low elevation riverine valleys of California and northern Baja California. Least Bell's vireos winter in southern Baja California, Mexico. The Service solicits review and comment from the public on this draft plan.

plan must be received on or before July 6, 1998, to be considered by the Service. ADDRESSES: Persons wishing to review the draft recovery plan may receive a copy by contacting the Carlsbad Field Office, U.S. Fish and Wildlife Service, 2730 Loker Avenue West, Carlsbad, California 92008. Written comments and material regarding the plan should also be addressed to the same address above.

Comments and material received are available on request for public inspection, by appointment, during normal business hours at the same address.

FOR FURTHER INFORMATION CONTACT: Jon Avery, U.S. Fish and Wildlife Service (see ADDRESSES) at 760/431–9440). SUPPLEMENTARY INFORMATION:

## **Background**

Restoring an endangered or threatened animal or plant to the point where it is again secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery Plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for reclassifying them from endangered to threatened or removing them from the list, and estimate the time and cost for implementing the needed recovery

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 et seq.) Requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Secion 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised Recovery Plan. The Service and other Federal agencies will take these comments into account in the course of implementing approved recovery plans.

The least Bell's vireo was listed as endangered on May 2, 1986. Critical habitat for the species was designated on February 2, 1994. The least Bell's vireo is an obligate riparian species during the breeding season, preferring early successional habitat. This species typically inhabits structurally diverse woodlands along watercourses. Extensive breeding habitat loss and degradation and brood parasitism by the brown-headed cowbird (Molothrus ater) have resulted in a rangewide decline of the least Bell's vireo. The objective of this plan is the reclassification of the least Bell's vireo to threatened and ultimately, delisting through recovery.

## **Public Comments Solicited**

The Service solicits written comments on the recovery plan described. All

comments received by the date specified above will be considered prior to approval of the plan.

# **Authority**

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(F).

Dated: March 30, 1998.

# Bay-Delta Advisory Council's Ecosystem Roundtable Meeting

**AGENCY:** Bureau of Reclamation,

Interior.

**ACTION:** Notice of meeting.

SUMMARY: The Bay-Delta Advisory
Council's (BDAC) Ecosystem
Roundtable will meet to discuss several
issues including: status of the May 1998
Proposal Solicitation Package, the
development of the other programs for
FY 98 funding, revised planning
process, funding coordination, CVPIA
FY 98 budget and other issues. This
meeting is open to the public. Interested
persons may make oral statements to the
Ecosystem Roundtable or may file
written statements for consideration.

**DATES:** The BDAC Ecosystem Roundtable meeting will be held from 9:00 a.m. to 1:00 p.m. on Friday, May 15, 1998.

ADDRESSES: The Ecosystem Roundtable will meet at the Resources Building, 1416 Ninth Street, Room 1131, Sacramento, CA 95814.

FOR FURTHER INFORMATION CONTACT: Cindy Darling, CALFED Bay-Delta Program, at (916) 657–2666. If reasonable accommodation is needed due to a disability, please contact the Equal Employment Opportunity Office at (916) 653–6952 or TDD (916) 653–6934 at least one week prior to the meeting.

SUPPLEMENTARY INFORMATION: The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The
