

currencies into U.S. dollars, unless the daily rate involves a fluctuation. In accordance with our practice, we have determined as a general matter that a fluctuation exists when the daily exchange rate differs from a benchmark by 2.25 percent. The benchmark is

defined as the rolling average of rates for the past 40 business days. When we determine a fluctuation exists, we substitute the benchmark for the daily rate. See Policy Bulletin 96-1 Currency Conversions, 61 FR 9434 (March 8, 1996).

#### Preliminary Results of Review

As a result of this review, we preliminarily determine that the following weighted-average dumping margin exists:

Manufacturer/exporter	Period	Margin (percent)
Ausimont S.p.A .....	08/01/96-07/31/97	40.90

Parties to the proceeding may request disclosure within five days of the date of publication of this notice. Any interested party may request a hearing within 30 days of publication. Any hearing, if requested, will be held 44 days after the date of publication, or the first workday thereafter. Case briefs and/or written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in the case briefs and comments, may be filed not later than 37 days after the date of publication. Parties who submit arguments in this proceeding are requested to submit with each argument: (1) A statement of the issue and (2) a brief summary of the argument. The Department will issue the final results of the administrative review, including the results of its analysis of issues raised in any such written comments or at a hearing, within 120 days of issuance of these preliminary results.

The Department shall determine, and Customs shall assess, antidumping duties on all appropriate entries. Because the inability to link sales with specific entries prevents calculation of duties on an entry-by-entry basis, we have calculated an importer-specific ad valorem duty assessment rate for the merchandise based on the ratio of the total amount of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate these duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total amount of antidumping duties, which are calculated by taking the difference between NV and CEP, by the total CEP value of the sales compared, and adjusting the result by the average difference between CEP and customs value for all merchandise examined during the POR.) Individual differences between CEP and NV may vary from the percentage stated above. Upon completion of this review, the

Department will issue appraisal instructions directly to Customs. The final results of this review shall be the basis for the assessment of antidumping dumping duties on entries of merchandise covered by the determination and for future deposits of estimated duties.

Furthermore, the following deposit requirements will be effective upon completion of the final results of this administrative review for all shipments of PTFE resin from Italy entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for Ausimont will be the rate established in the final results of administrative review; (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in the original less than fair value (LTFV) investigations or a previous review, the cash deposit will continue to be the most recent rate published in the final determination or final results for which the manufacturer or exporter received a company-specific rate; (3) if the exporter is not a firm covered in this review, a previous review, or the original investigation, but the manufacturer is, the cash deposit rate will be that established for the manufacturer of the merchandise in the final results of this review or the LTFV investigation; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review, the cash deposit rate will be 46.46 percent, the "all others" rate established in the LTFV investigation (50 FR 26019, June 24, 1985).

This notice also serves as a preliminary reminder to importers of their responsibility to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with the requirement could result in the Secretary's presumption that reimbursement of antidumping duties

occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1) and 19 CFR 353.22(1996)).

Dated: May 4, 1998.

##### Industrial Nitrocellulose from France: Preliminary Results of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of preliminary results of antidumping duty administrative review.

**SUMMARY:** In response to a request by the petitioner, Hercules Incorporated, the Department of Commerce is conducting an administrative review of the antidumping duty order on industrial nitrocellulose from France. The review covers Bergerac, N.C. (formerly identified by the name of its parent company, Societe Nationale des Poudres et Explosifs), and its affiliates for the period August 1, 1996, through July 31, 1997.

We have preliminarily determined that sales for Bergerac, N.C., have been made below normal value. If these preliminary results are adopted in our final results of administrative review, we will instruct U.S. Customs to assess antidumping duties on all appropriate entries.

We invite interested parties to comment on these preliminary results. Parties who submit comments in this proceeding are requested to submit with each argument (1) a statement of the

issue and (2) a brief summary of the argument.

**EFFECTIVE DATE:** May 11, 1998.

**FOR FURTHER INFORMATION CONTACT:** Bill Zapf, Lyn Johnson, or David Dirstine, Import Administration, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 482-4733.

**SUPPLEMENTARY INFORMATION:**

**The Applicable Statute and Regulations**

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR Part 351 (62 FR 27295).

**Background**

On August 10, 1983, the Department of Commerce (the Department) published in the **Federal Register** (48 FR 36303) the antidumping duty order on industrial nitrocellulose (INC) from France. On September 25, 1997, in accordance with 19 CFR 353.22(c), we published a notice of initiation of administrative review of this order for the period August 1, 1996, through July 31, 1997 (the POR) (62 FR 50292). The Department is conducting this administrative review in accordance with section 751 of the Act.

**Scope of Review**

The product covered by this review is INC containing between 10.8 and 12.2 percent nitrogen. INC is a dry, white, amorphous synthetic chemical produced by the action of nitric acid on cellulose. The product comes in several viscosities and is used to form films in lacquers, coatings, furniture finishes and printing inks. Imports of this product are classified under the HTS subheadings 3912.20.00 and 3912.90.00. The HTS item numbers are provided for convenience and customs purposes. The written descriptions of the scope of this proceeding remain dispositive.

**Export Price and Constructed Export Price**

For the price to the United States, we used export price (EP) or constructed export price (CEP) as defined in sections 772(a) and (b) of the Act, as appropriate. We calculated EP and CEP based on the packed f.o.b., c.i.f., or delivered price to unaffiliated purchasers in, or for exportation to, the United States. We made deductions, as appropriate, for

rebates. We also made deductions for any movement expenses in accordance with section 772(c)(2)(A) of the Act.

In accordance with section 772(d)(1) of the Act and the Statement of Administrative Action (SAA) (at 823-824) to the URAA, we calculated the CEP by deducting selling expenses associated with economic activities occurring in the United States, including commissions, direct selling expenses, and indirect selling expenses in the United States. For sales without payment dates, we calculated credit expenses using the date of the supplemental response. Finally, we made an adjustment to CEP for profit allocated to these expenses in accordance with section 772(d)(3) of the Act.

With respect to subject merchandise to which value was added in the United States prior to sale to unaffiliated U.S. customers, we determined that the special rule for merchandise with value added after importation under section 772(e) of the Act applied. Section 772(e) of the Act provides that, where the subject merchandise is imported by a person affiliated with the producer or exporter and the value added in the United States by the affiliated person is likely to exceed substantially the value of the subject merchandise, we shall determine the CEP for such merchandise using the price of identical or other subject merchandise if there is a sufficient quantity of sales to provide a reasonable basis for comparison and we determine that the use of such sales is appropriate. If there is not a sufficient quantity of such sales or if we determine that using the price of identical or other subject merchandise is not appropriate, we may use any other reasonable basis to determine the CEP.

To determine whether the value added is likely to exceed substantially the value of the subject merchandise, we estimated the value added based on the difference between the averages of the prices charged to the first unaffiliated purchaser for the merchandise as sold in the United States and the averages of the prices paid for the subject merchandise by the affiliated person. Based on this analysis, we determined that the estimated value added in the United States accounted for at least 65 percent of the price charged to the first unaffiliated customer for the merchandise as sold in the United States. Therefore, we determined that the value added is likely to exceed substantially the value of the subject merchandise. Also, we determined that there was a sufficient quantity of sales remaining to provide a reasonable basis for comparison and that the use of such

sales is appropriate. Accordingly, for purposes of determining dumping margins for these sales, we have used the weighted-average dumping margins calculated on sales of identical or other subject merchandise sold to unaffiliated persons. No other adjustments to EP or CEP were claimed or allowed.

**Normal Value**

In calculating normal value (NV), we determined that the quantity of foreign like product sold by the respondent in the exporting country was sufficient to permit a proper comparison with the sales of the subject merchandise to the United States pursuant to section 773(a)(1) of the Act because the quantity of sales in the home market was greater than five percent of the sales to the U.S. market. Therefore, in accordance with section 773(a)(1)(B)(i) of the Act, we based NV on the prices at which the foreign like products were first sold for consumption in the exporting country.

We used sales to affiliated customers only where we determined such sales were made at arm's-length prices, *i.e.*, at prices comparable to prices at which the firm sold identical merchandise to unrelated customers.

We calculated monthly, weighted-average NVs. Where possible, we compared U.S. sales to sales of identical merchandise in France. When identical merchandise was not sold during the relevant contemporaneous period, we compared U.S. sales to sales of the most similar foreign like product in accordance with sections 771(16)(B) and (C) of the Act.

(See the Matching Methodology section of our analysis memorandum to the file, dated April 17, 1998.)

Home-market prices were based on the packed, ex-factory or delivered prices to the affiliated and unaffiliated purchasers in the home market. We made deductions, where appropriate, for discounts, rebates, price adjustments and home market movement charges. Where applicable, we made adjustments for differences in packing and for movement expenses in accordance with sections 773(a)(6)(A) and (B) of the Act. We also made adjustments for differences in cost attributable to differences in physical characteristics of the merchandise pursuant to section 773(a)(6)(C)(ii) of the Act and for differences in circumstances of sale (COS) in accordance with section 773(a)(6)(C)(iii) of the Act and 19 CFR 353.56. For comparison to EP, we made COS adjustments by deducting home-market direct selling expenses from and adding U.S. direct selling expenses to NV. For comparisons to CEP, we made COS adjustments by deducting home-

market direct selling expenses from NV. We also made adjustments, where applicable, for home-market indirect selling expenses to offset U.S. commissions in CEP calculations.

#### Level of Trade

To the extent practicable, we determine NV for sales at the same level of trade as the U.S. sales (either EP or CEP). When there are no sales at the same level of trade, we compare U.S. sales to home-market sales at a different level of trade. The NV level of trade is that of the starting-price sales in the home market.

To determine whether home-market sales were at a different level of trade than U.S. sales for this review, we examined stages in the marketing process and selling functions along the chain of distribution between the producer and the unaffiliated customer. Based on the record evidence, we found that there were significant differences between the selling activities associated with the home-market level of trade and those associated with both EP and CEP. Therefore, we determined that EP and CEP sales are at a different level of trade than the home-market sales.

Consequently, we could not match U.S. sales to sales at the same level of trade in the home market. Moreover, data necessary to determine a level-of-trade adjustment was not available. Therefore, when we matched EP sales to sales in the home market, we made no level-of-trade adjustment. However, because home-market sales were made at a more advanced stage of distribution than that of the CEP level, we made a CEP-offset adjustment when comparing CEP and home-market sales, in accordance with section 773(a)(7)(B) of the Act. For a more detailed description of our analysis, see the Level-of-Trade section of our analysis memorandum dated April 17, 1998.

#### Preliminary Results of Review

As a result of our review, we preliminarily determine the weighted-average dumping margin for the period August 1, 1996, through July 31, 1997 to be as follows:

Company	Margin (percent)
Bergerac, N.C. ....	9.24

Any interested party may request a hearing within 30 days of the date of publication of this notice. A hearing, if requested, will be held 2 days after submission of rebuttal briefs at the main Commerce Department building.

Issues raised in the hearing will be limited to those raised in briefs and

rebuttal briefs. Briefs from interested parties may be filed no later than 30 days after the date of publication. Rebuttal briefs, limited to the issues raised in case briefs, may be filed no later than five days after the deadline for filing case briefs.

Parties who submit briefs or rebuttal briefs in this proceeding are requested to submit with each argument: (1) A statement of the issue, and (2) a brief summary of the argument.

The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any such written briefs or hearing. The Department will issue final results of this review within 120 days of publication of these preliminary results.

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. Because the inability to link sales with specific entries prevents calculation of duties on an entry-by-entry basis, we have calculated importer-specific *ad valorem* duty-assessment rates based on the ratio of the total amount of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total amount of antidumping duties, which are calculated by taking the difference between statutory NV and statutory EP or CEP, by the total statutory EP or CEP value of the sales compared and adjusting the result by the average difference between EP or CEP and customs value for all merchandise examined during the POR.) Bergerac, N.C., could not identify the importer of record for certain sales to unaffiliated customers. Therefore, we have calculated a single, per-unit duty assessment rate by dividing the total dumping margins by the total quantity sold for these importers.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Act: (1) The cash-deposit rates for Bergerac, N.C., will be the rate established in the final results of this review (except that no deposit will be required if the firm has a zero or *de minimis* margin, i.e., a margin less than 0.5 percent); (2) for previously reviewed or investigated companies not listed above, the cash-

deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation (LTFV), but the manufacturer is, the cash-deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash-deposit rate for all other manufacturers or exporters will be 1.38. This is the "all others" rate from the LTFV investigation which we are reinstating in accordance with the decisions by the Court of International Trade in *Floral Trade Council v. United States*, Slip Op. 93-79 (May 25, 1993), and *Federal-Mogul Corporation and The Torrington Company v. United States*, Slip Op. 93-83 (May 25, 1993). These cash-deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This determination is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Tariff Act.

Dated: May 4, 1998.
