Questar Pipeline Company; Notice of Tariff Filing

May 6, 1998.

Take notice that on May 1, 1998, Questar Pipeline Company (Questar) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, Sixth Revised sheet No. 71 and First Revised Sheet No. 71A, to be effective June 1, 1998.

Questar states that the technical implementation and programming of the business processes applicable to nominations tendered via Electronic Data Interchange (EDI) required Questar to choose one of three GISB model types for nominations—pathed, non-pathed, or pathed non-threaded. Questar states further that although none of the three model types matched perfectly the manner in which Questar's nomination process is administered, the pathed non-threaded model appeared to be the most closely related. Questar explains that implementation of the pathed non-threaded model nomination procedure and development of the associated priority-of-service algorithms requires priority-of-service tariff provisions to identify more discrete levels of service than the current tariff defines.

Accordingly, Questar is seeking Commission approval to modify Section 9.1, Priority of Service, to more discretely define and clarify priority-of-service levels that are consistent with the pathed non-threaded model nomination process.

Questar states that a copy of this filing has been served upon its customers, the Public Service Commission of Utah and the Public Service Commission of Wyoming.

Any person desiring to be heard or to protest this filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed as provided in Section 154.210 of the Commission's Regulations.
