SUPPLEMENTARY INFORMATION:

I. Background

The *Dictionary of Occupational Titles* (DOT) classifies nearly all jobs in the

United States economy. However, new jobs are constantly evolving, and old ones are eliminated as technology and other factors change. As the O*NET (Occupational Information Network) system, the automated replacement of the DOT, is in a developmental/transitional phase, the need for Occupational Code Requests (OCRs) remains.

The ETA 741 Form, the Occupational Code Request (OCR), was developed by the Occupational Analysis (OA) program, as a public service to the users of the revised DOT in an effort to help them in obtaining occupational codes, titles and definitions for jobs that they were unable to locate in the DOT. In addition, data provided on the OCR may also be useful indicators of potential occupations that should be studied as part of the new O*NET system.

Use of the OCR is voluntary and is provided only (1) as a uniform guideline to the public and private sectors to submit information, (2) and to assist O*NET in identifying potential changes in occupations or emerging occupations.

II. Current Actions

The Office of Policy and Research, during the development/transitional phase of O*NET (the Occupational Information Network) seeks to provide the both the public and private sectors with needed occupational codes that cannot be located in the DOT. Therefore, the need for continuing an existing collection of this information is requested.
