

into a contract to develop, produce, and dispose of minerals from Federal or Indian lands, that company or individual agrees to pay the United States or Indian tribe or allottee a share (royalty) monthly of the full value received for the minerals taken from leased lands.

The Auditing and Financial System (AFS) is the automated fiscal accounting system used by the Royalty Management Program (RMP) to account for revenues collected from Federal and Indian leases. The Report of Sales and Royalty Remittance, Form MMS-2014, is the only document used for reporting royalties, certain rents, and other lease-related transactions to MMS. AFS relies on data reported by payors on Form MMS-2014 for the majority of its processing.

In addition to accounting for royalties reported by payors, AFS, using Form MMS-2014 information, performs numerous other functions. These functions include monthly distribution of mineral revenues to State, Indian, and U.S. Treasury accounts; providing royalty accounting and statistical information to States, Indians, and others who have a need for such information; and identifying under reporting and nonreporting so MMS can promptly collect revenues. Sales and royalty information gathered through AFS is compared with production data collected by a second MMS system, the Production Accounting and Auditing System. This comparison of reported production with reported sales provides MMS with valuable cross-check capabilities for verification of production with reported sales.

Failure to collect the information provided by Form MMS-2014 would render it impossible to ensure that MMS is collecting and disbursing the full value of royalties received from production of leased lands. Collection of royalties directly impacts the amount of funds made available to the United States Treasury, to State governments, and to Indian tribes and allottees.

Description of Respondents: Companies or individuals (payors) that contract to develop, produce, and dispose of minerals from Federal or Indian lands and agree to pay the United States, Indian tribe or allottee royalties on the full value received for minerals taken from leased lands.

SUMMARY: To encourage continued production, provide an incentive for enhanced oil recovery projects, discourage abandonment of properties producing less than 15 barrels of oil per well-day, and reduce the operator's expenses, the Bureau of Land Management (BLM) will grant royalty rate reductions to operators of stripper oil properties. BLM amended 43 CFR 3103.4-2 to establish the conditions under which an operator or owner of a stripper oil property can obtain a reduction in the royalty rate for a property producing less than 15 barrels of oil per well-day. The amended regulations provided instructions for calculation of royalty rates based on the property's annual production rate.

Operators are then required to notify the Minerals Management Service (MMS) of the reduced royalty rate using Form MMS-4377, Stripper Royalty Rate Reduction Notification. The form requires identification of the operator, name of the contact person, lease and agreement numbers, calculated royalty rate, current royalty rate, qualifying period, and effective date of royalty rate reduction. MMS uses the information provided on the form to update the database with accepted reduced royalty rates. The reduced royalty rate will become effective for all oil production from qualifying properties the first day of the month after MMS receives notification of the rate change.
