Procedural Change Regarding American Shooks and Staves

AGENCY: Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by requiring the submission of a Customs Form (CF) 4455, Certificate of Registration, rather than a CF 3311, Declaration for Free Entry of Returned American Products, when shooks and staves produced in the United States are exported from the United States with the intention that they will be returned to the United States, exempt from duty, in the form of complete boxes or barrels in use as usual containers of merchandise. When boxes or barrels made from the exported American shooks and staves, for which a CF 4455 has been submitted, are imported, the importer of the boxes or barrels must use the CF 4455 as well to make such a claim. Shooks and staves produced in the United States that are exported and so returned are exempt from customs duties provided their identity is established by the proper submission of the CF 4455. The amendment helps to clarify the procedures regarding the free entry of such American produced shooks and staves returned to the United States.

SUPPLEMENTARY INFORMATION:

Background

Section 10.5, Customs Regulations (19 CFR 10.5) provides that shooks and staves produced in the United States and returned in the form of complete boxes or barrels in use as the usual containers of merchandise are exempt from any duties imposed by the tariff laws upon similar containers made of foreign shooks or staves, provided their identity is established under the regulations.

Paragraph (d) of § 10.5 provides that an exporter of shooks or staves in respect of which free entry is to be claimed when returned as boxes or barrels shall file a notice of intent to export on a Customs Form (CF) 3311 in triplicate with the director of the port of

exportation at least 6 hours before the lading of the articles on the exporting vessel. The CF 3311 is a Declaration for Free Entry of Returned American Products.

Paragraph (e) of § 10.5 provides that the certification of exportation block of CF 3311 shall be completed in triplicate by the port director after verification from the manifest of the exporting vessel and the return of the lading officer. The original shall be forwarded by the port director to the consignee. The duplicate copy shall be given to the exporter and the triplicate copy shall be retained.

Paragraph (f) of § 10.5 provides that whenever boxes or barrels alleged to have been manufactured from American shooks or staves are shipped to the United States from a person abroad other than the one to whom the shooks and staves were exported from the United States, the importer shall be required to obtain from the foreign consignee to whom the shooks or staves were originally exported the CF 3311s covering the exportation of the shooks or staves from the United States, or an extract therefrom signed by such consignee, showing the number of shooks or staves covered by such CF 3311s, together with the number of superficial feet of such shooks or staves. Such CF 3311 or extract therefrom, shall be filed by the importer in connection with the entry of the boxes or barrels.

Section 10.6, Customs Regulations (19 CFR 10.6), provides that an importer, seeking an exemption from duty on account of boxes or barrels made from American shooks or staves, must make such a claim on a CF 3311 at the time of filing the entry.

It has come to Customs attention that the CF 3311 may no longer be the best form available for Customs to track the exportation of United States-produced shooks and staves intended to be returned to the United States in the form of complete boxes or barrels and the importation of the boxes or barrels made from those shooks and staves. Further, as the CF 3311 was modified in 1990 and no longer contains the certification of exportation block, which is specifically mentioned in § 10.5(e), the regulations regarding shooks and staves are unclear as to the procedures.

After consideration of the best way of tracking the exportation of shooks and staves and the importation of boxes or barrels made from United States-produced shooks and staves, Customs has determined that the CF 4455, the Certificate of Registration, is the best vehicle. Accordingly, Customs is amending §§ 10.5 and 10.6 to require

the CF 4455 rather than the CF 3311 for tracking shooks and staves.

Regulatory Flexibility Act and Executive Order 12866

Because no notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act do not apply.

This document does not meet the criteria for a significant regulatory action under Executive Order (E.O.) 12866.

Inapplicability of Public Notice and Comment Requirements

Inasmuch as this amendment merely substitutes one Customs Form for another, pursuant to 5 U.S.C. 553(a)(2) and (b)(B), good cause exists for dispensing with the notice and public procedure thereon as unnecessary.
