SUMMARY: The Secretary of the Interior is responsible for the collection of

royalties from lessees who produce minerals from leased Indian lands. The Secretary is required by various laws to manage the production of mineral resources on Indian lands, to collect the royalties due, and to distribute royalty funds in accordance with those laws. The product valuation and allowance determination process is essential to assure that the Indians receive payment on the proper value of the minerals being removed. In order to determine whether the amount of royalty tendered represents the proper royalty due, it is first necessary to establish the proper value of the gas and gas plant products being sold, or otherwise disposed of, as well as the proper costs associated with the allowable deductions from the value of gas and gas plant products.

Under certain circumstances, lessees are authorized to deduct from royalty payments, the reasonable actual costs of transporting the royalty portion of produced minerals from the lease to a processing or sales point not in the immediate lease area. Transportation allowances are a part of the product valuation process which the Minerals Management Service (MMS) uses to determine if the lessee is reporting and paying the proper royalty amount. Before any deduction is taken, a Form MMS-4295, Gas Transportation Allowance Report, must be submitted to MMS.

When gas is processed for the recovery of gas plant products, lessees may claim a processing allowance. MMS normally will accept the cost as stated in the lessee's arm's-length processing contract as being representative of the cost of the processing allowance. In those instances where gas is being processed through a lessee owned plant, the processing costs shall be based upon the actual plant operating and maintenance expenses, depreciation, and a reasonable return on investment. The allowance is expressed as a cost per unit of individual plant products. Processing allowances may be taken as a deduction from royalty payments. Before any deduction may be taken, a Form MMS-4109, Gas Processing Allowance Summary Report, must be submitted to MMS.

Failure to collect the data described could result in the undervaluation of leased minerals. Regulations at 30 CFR 206 establish uniform product valuation and allowance policies for all Indian leases. These regulations require information in support of the product valuation or allowances being claimed. Without such information, MMS cannot evaluate the correctness of values or allowances reported and claimed.
