SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration (ITA) provides a multitude of export promotion programs to help U.S. businesses. These programs include information products, services, and trade events. To accomplish its mission effectively, ITA needs ongoing

feedback on its programs. This information collection item allows ITA to solicit clients' opinions about the use of ITA products, services, and trade events. The information is used for program improvement, strategic planning, allocation of resources, and performance measures.

The surveys are part of ITA's effort to implement objectives of the National Performance Review (NPR) and Government Performance and Results Act (GPRA). Responses to the surveys will meet the needs of ITA performance measures based on NPR and GPRA guidelines. These performance measures will serve as a basis for justifying and allocating human and financial resources.

Survey responses will acquaint ITA managers with firms' perceptions and assessments of export-assistance products and services. Also, the survey will enable ITA to track the performance of overseas posts. This information is critical for improving the programs.

Survey responses are used to assess client satisfaction, assess priorities, and identify areas where service levels and benefits differ from client expectations. Clients benefit because the information is used to improve services provided to the public. Without this information, ITA is unable to systematically determine client perceptions about the quality and benefit of its export-promotion programs.

II. Method of Data Collection

ITA faxes, mails or telephones surveys to clients.

IV. Request for Comments

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and costs) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or forms of information technology.
