

It is reasonable to expect that DOE will provide a portion of the cost for the military children's education. The precise dollar amount of the impacts cannot be calculated until the students are actually enrolled in the schools and the school district files an official application to DOE for receipt of impact aid funds.

#### Public Health and Safety

One commentor expressed concern that during Santa Ana wind conditions, the accident potential over the cities of Oxnard, Camarillo, and Port Hueneme would increase. The Air Installation Compatibility Use Zone Program included Santa Ana conditions in the calculations for the Accident Potential Zones ("APZs") shown in the FEIS. The APZs identified for Runway 03/21 mainly encompass agricultural land with the exception of the Naval Air Mobile Home Park.

#### Hazardous Material and Wastes

One commentor expressed concerns regarding the proportional increased risk of fuel spills from E-2 aircraft fuel handling. Spill prevention is an inherent part of NAWS Point Mugu fueling operations. All personnel who handle hazardous materials and wastes participate in a quarterly training update and are provided specific spill response guidance for their work areas.

#### Conclusions

In deciding where to realign E-2 aircraft from MCAS Miramar, I considered the following: the 1995 BRAC Commission recommendations; E-2 operational requirements; costs associated with construction of facilities, operation and maintenance of aircraft, and training of personnel; environmental impacts; and the comments received during the DEIS and FEIS review periods.

After carefully weighing all of these factors, I have decided, on behalf of the Department of the Navy, to direct realignment of four Pacific Fleet E-2 squadrons to NAWS Point Mugu. Environmental impacts are slightly more than the NAS Lemoore and NAF El Centro alternatives; however, the NAWS Point Mugu alternative is operationally preferred because of close proximity to operating areas, is the least expensive alternative and it fully uses excess capacity at NAWS Point Mugu.

Implementation of the Naws Point Mugu alternative will result in significant but manageable impacts to air quality and schools. Potentially significant adverse impacts to cultural resources will be mitigated to less than significant levels. The DON will

implement the mitigation measures identified in this Record of Decision.

Dated: June 2, 1998.

**DEPARTMENT OF ENERGY****Federal Energy Regulatory Commission**

[Docket No. RP98-91-005]

**CNG Transmission Corporation; Notice of Tariff Compliance Filing**

June 3, 1998.

Take Notice that on May 29, 1998, CNG Transmission Corporation (CNG) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Thirty-Seventh Revised Sheet No. 32  
 Thirty-Seventh Revised Sheet No. 33  
 Sub. Second Revised Sheet No. 361A

CNG states that proposed Sheet 361A contains CNG's revised tariff language to Section 18.5 of the General Terms and Conditions of its FERC Gas Tariff addressing the implementation of CNG's Accelerated Capital Recovery Mechanism (ACRM) surcharge. Revised Sheet Numbers 32 and 33 reflect the implementation of the ACRM surcharge. CNG requests an effective date of June 15, 1998, for the revised Section 18.5, the date which the Commission accepted CNG's ACRM surcharge in the above-referenced Orders.

CNG states that the purpose of this filing is to comply with the Commission's January 14, 1998 Order to reflect an effective date of June 15, 1998 for Section 18.5. CNG proposes to actually assess the surcharge effective July 1, 1998 to avoid multiple administrative difficulties. These include billing complications due to multiple rates for the same month, and interference with capacity release transactions. Further, CNG's request is analogous to GISB standard 1.3.28 that prohibits a mid-month rate change for fuel retention.

CNG states that copies of its filing has been mailed to CNG's customers and interested state commissions.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NW., Washington, DC 20426, in accordance with Section

385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

**CNG Transmission Corporation; Notice of Tariff Filing**

June 3, 1998.

Take notice that on May 29, 1998, CNG Transmission Corporation (CNG) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets, with an effective date of July 1, 1998:

Thirty-Eighth Revised Sheet No. 32  
 Thirty-Eighth Revised Sheet No. 33  
 Third Revised Sheet No. 361A

CNG states that proposed Sheet 361A contains CNG's revised tariff language to Section 18.5, Accelerated Capital Recovery Mechanism (ACRM) surcharge, of the General Terms and Conditions of its FERC Gas Tariff. Revised Sheet Numbers 32 and 33 reflect the revised ACRM surcharge. CNG requests an effective date of June 15, 1998, for the revised Section 18.5, the date which the Commission accepted CNG's ACRM surcharge in the above-referenced Orders.

CNG states that the purpose of this filing is to revise CNG's ACRM surcharge. As revised, CNG would bill this surcharge July 1, 1998, through December 31, 2000, in accordance with the proposed Section 18.5 of the General Terms and Conditions set forth in CNG's FERC Gas Tariff. Although the Commission approved the surcharge effective June 15, 1998, CNG proposes to actually assess the surcharge effective July 1, 1998 to avoid multiple administrative difficulties. These include billing complications due to multiple rates for the same month, and interference with capacity release transactions. Further, CNG's request is analogous to GISB standard 1.3.28 that
