Needs and Uses: FCC Form 314 is required to be filed when applying for consent for assignment of an AM, FM or TV broadcast station construction permit or license. In addition, the applicant must notify the Commission when consummation of an approved assignment of a broadcast station construction permit or license is completed.

On 3/7/96, the Commission adopted an Order which amended the Commission's rules to eliminate current national multiple radio ownership restrictions and to relax local radio ownership restrictions (the "radio

This collection also includes the third party disclosure requirement of Section 73.3580. This section requires local public notice in a newspaper of general circulation of the filing of all applications for assignment of license/permit. This notice must be completed within 30 days of the tendering of the application. This notice must be published at least twice a week for two consecutive weeks in a three-week period. A copy of this notice must be placed in the public inspection file along with the application. Additionally, an applicant for assignment of license must broadcast the same notice over the station at least once daily on four days in the second week immediately following the tendering for filing of the application.

The data is used by FCC staff to determine whether the applicants meet basic statutory requirements to become a Commission licensee/permittee.
