

absorbers. In NRC's November 7, 1996, safety evaluation of the TN-32 cask Safety Analysis Report, the staff concluded that fixed neutron poisons in the TN-32 cask will remain effective for the 20-year storage period. The applicant evaluated the criticality and radiological aspects of the North Anna ISFSI based on use of the TN-32 cask, as described in the North Anna ISFSI Safety Analysis Report. Consistent with the staff conclusions in the November 7, 1996, safety evaluation, the applicant did not propose any verification of TN-32 cask neutron absorber efficacy. The staff evaluated the environmental effects of the North Anna ISFSI and issued its findings in the April 4, 1997, EA. Granting an exemption from the requirements of 10 CFR 72.124(b) will have no environmental impact because the staff has determined, through its safety evaluation of the TN-32 cask, that periodic verification of the neutron absorber efficacy is not needed to assure that the fixed neutron poisons in the TN-32 cask will remain effective during the storage period.

Alternative to the Proposed Action

Since there are no environmental impacts associated with the proposed actions, alternatives are not evaluated other than the no action alternative. The alternative to the proposed action would be to deny approval of the exemption and, therefore, not allow (1) submittal of an annual effluent release report by May 1 rather than within 60 days of January 1, or (2) storage of ISFSI spent fuel records at a single qualified record storage facility, or (3) elimination of the requirement to verify the efficacy of neutron absorbing materials. These alternatives would have the same, or greater, environmental impacts.

Agencies and Persons Consulted

An official from the State of Virginia Bureau of Radiological Health was contacted about the EA for the proposed action and had no concerns.

Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements set forth in 10 CFR Part 51. Based upon the foregoing EA, the Commission finds that the proposed action of (1) granting an exemption from 10 CFR 72.44(d)(3) so that Virginia Power may submit an annual effluent release report by May 1 of each year, (2) granting an exemption from 10 CFR 72.72(d) so that Virginia Power may store records of spent fuel stored at the ISFSI in a single record storage facility which meets the standards of ANSI N45.2.9-1974, and

(3) granting an exemption from 10 CFR 72.124(b) so that Virginia Power need not verify the efficacy of the neutron absorbing material in ISFSI storage casks will not significantly impact the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

This application was docketed under 10 CFR Part 72, Docket 72-16. For further details with respect to this action, see the application for an ISFSI license dated May 9, 1995, and the request for exemption dated April 29, 1998, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, DC 20555, and the Local Public Document Room at the University of Virginia, Alderman Library, Charlottesville, Virginia 22903.

NUCLEAR REGULATORY COMMISSION

Biweekly Notice; Applications and Amendments to Facility Operating Licenses Involving no Significant Hazards Considerations

I. Background

Pursuant to Public Law 97-415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from May 22,
