## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[CA 198-0077; FRL-6112-5]

#### Approval and Promulgation of State Implementation Plans; California State Implementation Plan Revision; San Diego County Air Pollution Control District; San Joaquin Valley Unified Air Pollution Control District

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** EPA is finalizing the approval of revisions to the California State Implementation Plan (SIP) proposed in the **Federal Register** on October 10, 1997, and March 30, 1998. The revisions concern San Diego County Air Pollution Control District (SDCAPCD) Rule 67.10 and San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) Rule 4401. SDCAPCD Rule 67.10 controls volatile organic compound (VOC) emissions from kelp processing and bio-polymer manufacturing operations, and SJVUAPCD Rule 4401 controls VOC emissions from steam-enhanced crude oil production well vents. This final action will incorporate these rules into the Federally-approved SIP and will also permanently stop the sanctions and Federal implementation plan clocks that were started on February 14, 1996, and September 27, 1996, respectively, when EPA published final limited disapproval actions for the State's previous submittals of these rules. The intended effect of approving these rules is to regulate emissions of VOCs in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). Thus, EPA is finalizing the approval of these revisions into the California SIP under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

**EFFECTIVE DATE:** This action is effective on July 22, 1998.

**ADDRESSES:** Copies of these rules and EPA's evaluation report for each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rules are available for inspection at the following locations:

#### SUPPLEMENTARY INFORMATION:

##### I. Applicability

The rules being approved into the California State Implementation Plan (SIP) are San Diego County Air Pollution Control District (SDCAPCD) Rule 67.10, Kelp Processing and Bio-Polymer Manufacturing Operations, and San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) Rule 4401, Steam-enhanced Crude Oil Production Well Vents. These rules were submitted by the California Air Resources Board (CARB) to EPA on August 1, 1997, and March 10, 1998, respectively.

##### II. Background

On October 10, 1997, in 62 FR 52959, EPA proposed to approve SDCAPCD Rule 67.10, Kelp Processing and Bio-Polymer Manufacturing Operations, into the California SIP. Rule 67.10 was adopted by SDCAPCD on June 25, 1997. The rule was submitted by CARB to EPA on August 1, 1997. On March 30, 1998, in 63 FR 15116, EPA proposed to approve SJVUAPCD Rule 4401, Steam-

enhanced Crude Oil Production Well Vents, into the California SIP. Rule 4401 was adopted by SJVUAPCD on January 15, 1998, and was submitted by CARB to EPA on March 10, 1998. Both rules were submitted in response to EPA's 1988 SIP-Call and the 1990 Clean Air Act (CAA or the Act) section 182(a)(2)(A) requirement that nonattainment areas fix their reasonably available control technology (RACT) rules for ozone in accordance with EPA guidance that interpreted the requirements of the pre-amendment Act. A detailed discussion of the background for each rule is provided in the appropriate proposed rulemaking document cited above.

EPA has evaluated the above rules for consistency with the requirements of the CAA and EPA regulations and EPA interpretation of these requirements as expressed in the various EPA policy guidance documents referenced in the proposed rulemaking documents cited above. EPA has found that the rules meet the applicable EPA requirements. A detailed discussion of the rule provisions and evaluation has been provided in each proposed rulemaking and in the technical support documents available at EPA's Region IX office.

##### III. Response to Public Comments

A 30-day public comment period was provided in 62 FR 52959 and 63 FR 15116. No comments were received.

##### IV. EPA Action

EPA is finalizing action to approve the above rules for inclusion into the California SIP. EPA is approving the rules under section 110(k)(3) as meeting the requirements of section 110(a) and Part D of the CAA. This approval action will incorporate these rules into the Federally-approved SIP and will also stop the sanctions process and Federal implementation plan clocks, which were started on February 14, 1996, and September 27, 1996, when limited disapproval actions were published in the **Federal Register**. The intended effect of approving these rules is to regulate emissions of volatile organic compounds (VOCs) in accordance with the requirements of the CAA.

The final action on these rules serves as a final determination that the deficiencies in these rules have been corrected. Therefore, on July 22, 1998, any sanction or Federal implementation plan clock is permanently stopped.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation
