Southern Natural Gas Company; Notice of Availability of the Draft Supplement to the Final Environmental Impact Statements for the Proposed Amended North Alabama Pipeline Project

June 19, 1998.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared this Draft Supplement to the Final Environmental Impact Statement (Supplement) for the North Alabama Pipeline Project and it addresses the environmental impact of the amended natural gas pipeline project proposed by Southern Natural Gas Company (Southern) in the above-referenced docket.

The staff prepared the Supplement to satisfy the requirements of the National Environmental Policy Act. The staff concludes that the Amended North Alabama Pipeline Project would result in limited adverse environmental impact if it is constructed as planned and with the additional mitigation recommended in this Supplement. This document supplements the *North Alabama Pipeline Project Final Environmental Impact Statement* (FEIS) that was noticed by the U.S. Environmental Protection Agency in the **Federal Register** on May 30, 1997. The Supplement only examines the route changes north of milepost 95.25 (about milepost 91.2 of the route previously studied in the FEIS). There are no changes in the facilities south of milepost 95.25.

The Supplement assesses the potential environmental effects of construction and operation of the following Southern facilities:

- About 27.1 miles of interstate natural gas pipeline (26.9 miles of 16-inch-diameter pipeline and 0.2 mile of 12-inch-diameter pipeline); and
- Two new meter stations, and related facilities.

Facilities required by two local distribution companies to receive natural gas from Southern are also examined.

The purpose of Southern's proposed facilities would be to transport a total of 69,000 thousand cubic feet per day of natural gas to one existing and two new customers in northern Alabama.

Procedures

The meetings will be recorded by a stenographer and will become part of the formal record of the Commission proceeding on the projects. Individuals presenting statements at the meetings will be asked to sign in before the meeting starts and to clearly identify themselves for the record. Speaking time for attendees at the meetings will be determined before the meeting, based on the number of persons wishing to speak and the approximate amount of time available for the session. All speakers will be provided at least 5 minutes to present their views.

Individuals, organizations, and agencies with environmental expertise and concerns are encouraged to attend the meetings and to assist the staff in defining and clarifying the issues to be addressed in the EA.

Persons choosing not to speak at the meetings, but who have views on the issues, may submit written statements for inclusion in the public record at the meeting. In addition, written scoping comments may be filed with the Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E.,

Washington, D.C. 20426, not later than August 24, 1998. All filings should contain an original and eight copies, and must clearly show at the top of the first page the project names(s) and project number(s).
