

basis replacement facilities in Monroe County, Ohio constructed pursuant to Part 284, Subpart I of the Commission's Regulations, and abandon in place the facilities which were replaced, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Eastern states that on May 6, 1998, its Main Line No. 10 ruptured in a rural area approximately one mile south of Beallsville, Ohio. It is stated that the rupture occurred near the bottom of a steep hillside. Texas Eastern indicates that after the rupture, Texas Eastern closed valves on both sides of the rupture and dispatched crews to assess damage and evaluate further actions. It is further stated that its 30-inch Line 15, which is parallel to Line 15 in the same right of way was taken out of service as a safety measure.

Texas Eastern states that it installed replacement facilities under the terms of the emergency regulations set forth in Subpart I of the Commission's Regulations. Specifically, Texas Eastern has installed approximately 933 feet of 30-inch pipeline as part of its Main Line No. 10 and 928 feet of 30-inch pipeline as part of its Main Line No. 15. Texas Eastern indicates that the replacement facilities were offset approximately 280 feet south of Texas Eastern's existing Main Line Nos. 10 and 15 following a route around a steep hillside and proceeding up a less severe slope to reconnect with Lines Nos. 10 and 15 on the top of the hill.

Texas Eastern states that it cut, capped and filled the replaced segments of Lines 10 and 15 with water and proposes to permanently abandon these segments in place.

Texas Eastern estimates a total cost of the replacement project at \$4,400,000, which is being financed from funds on hand.
