BILLING CODE 4910-15-M

POSTAL RATE COMMISSION**39 CFR Part 3001**

[Docket No. MC96-1; Order No. 1214]

Amendments to Domestic Mail Classification Schedule

AGENCY: Postal Rate Commission.

ACTION: Final rule.

SUMMARY: This final rule revises the Domestic Mail Classification Schedule (DMCS) by eliminating provisions related to a barcoded small parcel experiment. These provisions expired April 28, 1998. Given the status of the experiment and the Postal Service's intention not to request an extension or seek a permanent classification, elimination of these provisions will

ensure that the DMCS accurately reflects current classifications and discounts.

DATES: This rule was effective April 28, 1998.

FOR FURTHER INFORMATION CONTACT:

Stephen L. Sharfman, General Counsel, Postal Rate Commission, 1333 H Street NW, Suite 300, Washington, DC, 20268-0001, 202-789-6820.

SUPPLEMENTARY INFORMATION: One of the provisions recommended by the Commission and approved by the Governors in Docket No. MC96-1, Experimental First-Class and Priority Mail Small Parcel Automation Rate Category, specified that the experiment would be limited to a two-year period, ending April 28, 1998. Shortly before the expiration date, the Postal Service published a notice in the **Federal Register** stating its intention to allow the experiment to end on the scheduled expiration date without filing a request with the Commission to establish permanent classifications and discounts. The notice also briefly reviewed the basic objectives of the experiment and the reasons why the Service decided against pursuing a permanent classification. See generally 63 FR 19407-19408 (April 20, 1998).

For the reasons stated above, the Commission hereby adopts the following amendment to the DMCS, which is incorporated by reference in the Code of Federal Regulations (see 39 CFR part 3001, Appendix A to Subpart C—Postal Service Rates and Charges).

List of Subjects in 39 CFR Part 3001

Administrative practice and procedure, Postal Service.

For reasons set out in the preamble, the Commission amends 39 CFR part 3001 as follows:

PART 3001—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for 39 CFR part 3001 continues to read as follows:

Authority: 39 U.S.C. 404(b), 3603, 3622-3624, 3661, 3662.

Subpart C—Rules Applicable to Requests for Establishing or Changing the Mail Classification Schedule**Appendix A to Subpart C—[Amended]**

2. Appendix A to Subpart C—Postal Service Rates and Charges is amended as follows:

- a. Remove 221.4.
- b. Remove and reserve 223.4.
- c. Remove "Pre-barcoded parcels (experimental)" and footnote 11 in First-Class Mail Rate Schedule 221, Letters and Sealed Parcels.

d. Remove note 5 in First-Class Mail Rate Schedule 223 Priority Mail Subclass.

Dated: June 23, 1998.

Margaret P. Crenshaw,
Secretary.

BILLING CODE 7710-FW-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 12

[IN85-1a; FRL-6115-7]

Approval and Promulgation of Implementation Plan; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: On February 25, 1994, the State of Indiana submitted regulations as a revision to the ozone State Implementation Plan (SIP), governing the control of Volatile Organic Compound (VOC) emissions from graphic arts sources in Lake and Porter Counties. EPA approved these regulations on May 4, 1995, subject to the condition that the State adopt appropriate record keeping and reporting requirements. On July 24, 1997, the State of Indiana submitted a SIP revision request to the EPA containing, among other things, record keeping and reporting requirements for all graphic arts sources in Indiana. VOC is one of the air pollutants which combine on hot, sunny summer days with oxides of nitrogen to form ground-level ozone, commonly known as smog, in and downwind of significant source areas, such as large urban areas. Ozone pollution is of particular concern because of its harmful effects on lung tissue and breathing passages. The State's rule revisions are designed to meet the Clean Air Act (Act) requirement for States to adopt Reasonably Available Control Technology (RACT) rules for sources that are covered by Control Techniques Guideline (CTG) documents or that are major sources for VOC. This rulemaking action approves, through direct final action, the Indiana SIP revision request as it pertains to graphic arts sources.

DATES: The "direct final" rule is effective on August 28, 1998, unless EPA receives adverse or critical written comments by July 29, 1998. If adverse comments are received, EPA will publish a timely withdrawal of the rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Copies of the revision request are available for inspection at the following address: U.S. Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. (It is recommended that you telephone Mark J. Palermo at (312) 886-6082 before visiting the Region 5 Office.)

Written comments should be sent to: J. Elmer Bortzer, Chief, Regulation Development Section, Air Programs Branch (AR-18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.

SUPPLEMENTARY INFORMATION:

I. Background

On November 15, 1990, Congress enacted amendments to the Clean Air Act; Pub. L. 101-549, 104 Stat. 2399, codified at 42 U.S.C. 7401-7671q.

Section 182(b)(2) of the Act requires all States with moderate and above ozone nonattainment areas to adopt RACT rules for VOC sources that are located within these ozone nonattainment areas and that are covered by CTG documents. One source category to be controlled by application of RACT rules is graphic arts.

In Indiana, VOC emission control requirements for graphic arts sources are contained in Indiana Administrative Code (IAC) rule 326 IAC 8-5-5. This rule applies to packaging rotogravure, publication rotogravure, and flexographic printing sources. On February 25, 1994, the State of Indiana submitted a revision request for its ozone SIP amending the graphic arts rule. This amendment functioned to reduce the source size applicability cut-off for graphic arts sources located in the severe ozone nonattainment area (Lake and Porter Counties) from 100 to 25 tons of VOC per year (potential to emit) as required by sections 182(b)(2) and 182(d) of the Act.

Based on a review of the February 25, 1994 submittal, the EPA proposed to conditionally approve the rule revision on January 10, 1995 (60 FR 2568), and completed final rulemaking to conditionally approve the SIP revision on May 4, 1995 (60 FR 22241). At that time, the EPA stated that, although the revised rule contained acceptable VOC emission control requirements for graphic arts sources, it did not include specific record keeping and reporting requirements needed to make the rule sufficiently enforceable. EPA's conditional approval was based on a

December 14, 1994 commitment from the State to correct the rule to add appropriate record keeping and reporting requirements.

The rule revisions submitted by the Indiana Department of Environmental Management (IDEM) on July 24, 1997, were designed, in part, to provide the record keeping and reporting requirements for graphic arts sources. The submittal also includes additional revisions to rule 326 IAC 8-5-5. These rule revisions are addressed in this rulemaking.

IDEM's July 24, 1997 submittal also includes rule revisions for miscellaneous metal coating sources that employ the use of dip tanks or flow coating operations. These rule revisions will be addressed in a separate, future rulemaking.

II. Summary of Rule Revisions

In the discussion which follows, to remain consistent with definitions used by IDEM (these definitions differ in some respect from those used by other States and from those typically used by the EPA (EPA typically reverses the following definitions)), the following definitions are used in this rulemaking:

Facility means any one (1) structure, piece of equipment, installation, or operation which emits or has the potential to emit any air contaminant. Single pieces of equipment or single installations with multiple emission points shall be considered as a single facility.

Source means an aggregation of one (1) or more facilities which are located on one piece of property or on contiguous or adjacent properties, and which are owned or operated by the same person (or by persons under common control).

These definitions are found in Indiana's rules 326 IAC 1-2-27 and 326 IAC 1-2-72, respectively.

The following summarizes the contents of the newly adopted rules or the adopted revisions to the existing rules.

Rule 326 IAC 8-1-9

This rule has been adopted to cover general record keeping and reporting requirements for graphic arts sources subject to new rules 326 IAC 8-1-10 through 326 IAC 8-1-12. Rule 326 IAC 8-1-9 states that the applicable test methods and procedures specified in rule 326 IAC 8-1-4 (testing procedures) shall be used to determine: (1) the VOC content of each coating as applied; and (2) the efficiency of each emissions capture system and control device. Records required by this rule, including those used to demonstrate source exemption from applicable emission control requirements, must be submitted to IDEM or EPA upon request. All
