

acre Hat Island adjacent to the boundary of the Padilla Bay National Estuarine Research Reserve (PBNERR) within the PBNERR boundary. Hat Island, currently in state ownership, contains primarily forested upland, rocky cliffs, rocky shores, and intertidal seagrass habitats. The island supports old growth forests dating back to the 1600's, active nesting and perching habitat for state and federally threatened and endangered bird species, and unique vegetative communities including the "Idaho bunchgrass" recommended for protection by the Washington State Natural Heritage Program. It provides ideal research and education opportunities for the PBNERR.

**SUPPLEMENTARY INFORMATION:** The Padilla Bay National Estuarine Research Reserve (PBNERR) was designated in 1980 pursuant to section 315 of the Coastal Zone Management Act of 1972, as amended, 16 U.S.C. 1461. The PBNERR includes more than 10,000 acres within its administrative boundary comprising eelgrass, subtidal sand and mud habitats, and an upland farm area.

Washington State requested NOAA approval to amend the PBNERR boundary to include the state-owned Hat Island adjacent to the current boundary. For several years Hat Island has been discussed for possible inclusion into the PBNERR boundary. During original boundary planning efforts by the Governor's Steering Committee for the Reserve in 1979-80, Hat Island was recognized as a valuable asset for inclusion, but due to its private ownership and extreme high cost, it was decided to leave it outside the boundary and only include the two islands (Saddlebag and Dot) to the north which were already owned by the State. Interest in including Hat Island at a future date was noted in the management plan for future consideration. In the early 1990's, Hat Island was purchased by the Nature Conservancy, and then by the State with funds appropriated for the Washington Wildlife and Recreation Program, with interim management responsibility granted to the Washington Department of Natural Resources (WDNR).

Discussions between the Washington Department of Ecology (the PBNERR's managing authority) and the WDNR have concluded that the island is best suited for inclusion in the PBNERR.

The inclusion of Hat Island into the PBNERR will enhance opportunities for research, monitoring, education, and management of Puget Sound's unique estuarine resources.

The expansion proposes inclusion of the 92 acres Hat Island on the western boundary of the PBNERR. This island is dominated by forested uplands, including old growth stands of Douglas fir, steep rocky cliffs, unique vegetative communities, and rocky shoreline, and intertidal and subtidal seagrass communities.

Any person wishing to comment on the proposed boundary expansion may forward written comments to Ms. Nina Garfield, Sanctuaries and Reserves Division, Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration, 1305 East-West Highway, SSMC4, 11th Floor, Silver Spring, MD 20910. Comments must be submitted no later than thirty (30) calendar days from issuance of this notice.
