to utilize a secure computerized program of recording hours of duty information which would not comply with the above requirements for a "signature" of the employee or ranking crew member. Amtrak and the FEC propose that each railroad's train and engine employee will have his or her own unique identification number and personal identification number (PIN). The PIN will remain confidential to the employee. When accessing the computer for input of the hours of service record, required by § 228.11, the (PIN) will not appear on the computer screen when the employee enters his or her number. All data entered under access gained through use of the confidential PIN will be electronically stamped with the entering employee's name. The program will display the electronic signature on the employee's hours of duty record. Amtrak and the FEC requests a waiver to use the electronic stamp to satisfy the signature requirements of the "Hours of Service of Railroad Employees." The railroads maintain that the change is in the best interests of all parties, in that, it will reduce unnecessary paperwork and the costs associated therewith while providing the railroads, its employees and the FRA with a superior level of

information on a more timely basis than is currently available.
