Public participation is important to the analysis. People may visit with Forest Service officials at any time during the analysis and prior to the decision. No formal scoping meetings are planned. However, two periods are specifically designated for comments on the analysis:

- (1) During this scoping process; and
- (2) During the draft EIS comment period.

During the scoping process, the Forest Service is seeking information and comments from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. A scoping document will be mailed to parties known to be interested in the proposed action. The agency invites written comments and suggestions on this action, particularly in terms of issues and alternatives.

The Forest Service will continue to involve the public and will inform interested and affected parties as to how they may participate and contribute to the final decision. Another formal opportunity for response will be provided following completion of a draft EIS.

The draft EIS should be available for review in March, 1999. The final EIS is scheduled for completion in June, 1999.

The comment period on the draft EIS will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes it is important, at this early stage, to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so it is meaningful and alerts the agency to the reviewer's position and contentions.

Vermont Yankee Nuclear Power Corp. v. NRDC, 435 U.S. 519, 533 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritage v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important those interested in this proposed action participate by the close of the 45 day comment period so substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

I am the responsible official for this environmental impact statement. My address is Lolo National Forest, Building 24, Fort Missoula, Missoula MT 59804.

Authority: 40 CFR 1508.220.

Dated: July 10, 1998.
