

**BAHAMAS, THE**

(In North America, CANADA DOES NOT QUALIFY for this year's Diversity Program.)

Applicants must meet ALL eligibility requirements under the U.S. law in order to be issued visas. Processing of applications and issuance of diversity visas to successful applicants and their eligible family members MUST occur by September 30, 2000. Family members may not obtain diversity visas to follow to join the applicant in the U.S. after this date.

**IMPORTANT NOTICE:** There is NO initial fee, other than postage required to enter the DV-2000 program. The use of an outside intermediary or assistance to prepare a DV-2000 entry is entirely at the applicant's discretion. Qualified entries received directly from applicants or through intermediaries have equal chances of being selected by computer. There is no advantage to mailing early, or mailing from any particular locale. Every application received during the mail-in period will have an equal random chance of being selected within its region. However, more than one application per person will disqualify the person from registration.

**Selection of Winners**

The selection of winners is made at random and no outside service can legitimately improve an applicant's chances of being chosen or guarantee that an entry will win. Any service that claims it can improve an applicant's odds is promising something it cannot lawfully deliver.

Persons who think they have been cheated by a U.S. company or consultant in connection with the Diversity Visa Lottery may wish to contact their local consumer affairs office or the National Fraud Information Center at 1-800-876-7060 or 1-202-835-0159 from 9:00 am to 5:30 p.m. (EST), Monday through Friday or 1-202-835-0159; Internet address: <http://www/fraud.org>. The U.S. Department of State does not investigate consumer complaints against businesses in the United States.

**Notifying Winners**

Only successful entrants will be notified. They will be notified by mail between April and July of 1999 at the address listed on their entry. Winners will also be sent instructions on how to apply for an immigrant visa, including information on the fee for immigrant visas and a separate visa lottery surcharge. Successful entrants must complete the immigrant visa application process and meet all eligibility

requirements under U.S. law to be issued a visa.

Being selected as a winner in the DV Lottery does not automatically guarantee being issued a visa even if the applicant is qualified, because the number of entries selected and registered is greater than the number of immigrant visas available. Those selected will, therefore, need to complete and file their immigrant visa applications quickly. Once all 50,000 visas have been issued or on September 30, 1999, whichever is sooner, the DV Program for Fiscal Year 2000 will end.

**Obtaining Instructions on Entering the DV Lottery**

The above information on entering the DV-2000 Program is also available 24 hours a day to persons within the United States by calling the Department of State's Visa Lottery Information Center at 1-900-884-8840 at a flat rate of \$5.10 per call. Callers will first hear some basic information about the DV Lottery and will be requested to provide their name and address so that printed instructions can be mailed to them. Applicants overseas may continue to contact the nearest U.S. Embassy or Consulate for instructions on the DV Lottery.

Dated: July 29, 1998.

[Summary Notice No. PE-98-15]

**Petitions for Exemption; Summary of Petitions Received; Disposition of Petitions Issued**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of petitions for exemption received and of dispositions of prior petitions.

**SUMMARY:** Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain partitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's

regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

**DATES:** Comments on petitions received must identify the petition docket number involved and must be received on or before August 24, 1998.

**ADDRESSES:** Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC-200), Petition Docket No. \_\_\_\_\_, 800 Independence Avenue, SW., Washington, D.C. 20591.

Comments may also be sent electronically to the following internet address: 9-NPRM-CMTS@faa.dot.gov.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-200), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 267-3132.

### National Highway Traffic Safety Administration

[Docket No. NHTSA 98-4075]

#### General Motors; Grant of Application for Decision of Inconsequential Noncompliance

General Motors Corporation (GM) of Warren, Michigan, determined that some of its 1997 model Chevrolet Corvettes failed to meet the requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 124, "Accelerator Control Systems," and filed an appropriate report pursuant to 49 CFR Part 573, "Defects and Noncompliance Reports." GM also applied to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301—"Motor Vehicle Safety" on the basis that the noncompliance is inconsequential to motor vehicle safety.

Notice of receipt of the application was published on September 16, 1997, and an opportunity afforded for comment (Docket No. 97-58, Notice 1; 62 FR 48708).

Paragraph S5.2 of FMVSS No. 124 requires the throttle to return to idle position within the time limits specified in S5.3, whenever any component of the accelerator control system is disconnected or severed at a single point. S5.3 requires return to idle within 3 seconds for any vehicle exposed to temperatures of 0 degrees to -40 degrees F (-18 degrees to -40 degrees C). During the 1997 model year, GM produced 9,500 Chevrolet Corvettes, which will not comply with FMVSS No. 124 because, when tested with one return spring removed at temperatures below -26 degrees F, their accelerator pedal module assembly does not move quickly enough to cause the throttle to return to the idle position within 3 seconds.

GM described the noncompliance and supported its application with the following arguments:

The Chevrolet Corvette employs an electronic throttle control which adjusts the throttle position based on input from the accelerator pedal position. The accelerator pedal is equipped with three springs, any two of which are capable of returning the pedal to rest position. Once this occurs, the throttle returns to idle position approximately 0.2 seconds later. A test run in early May, however, raised a question about the ability of the pedal assembly to return at low temperatures.

GM believes that the failure of the pedal assembly to meet the throttle closing time requirements of FMVSS No. 124 at extremely low temperatures is inconsequential to motor vehicle safety for the following reasons.

1. *Vehicle Controllability*—In the unlikely event that all of the prerequisites necessary for the noncompliance occurred—that is, a return spring was disconnected or severed on a pedal assembly with residual oil, and the vehicle soaked at ambient temperatures below -32 degrees C—the vehicle would continue to be controllable both by the service brakes and as a result of the Brake Torque Management System.

2. *Reliability of the Accelerator Springs*—The condition which is the subject of GM's noncompliance decision can only occur if one of the return springs is severed or disconnected. The springs in the Corvette pedal assembly, however, have extremely high reliability and are not likely to fail in the real world.

3. *Condition Requires Extreme Temperatures; Pedal Assembly Warms Quickly*—As mentioned above, the root cause of the noncompliance condition is the residual oil on the pedal assemblies congealing below -32 degrees C. Testing at temperatures above that level resulted in full compliance with the FMVSS No. 124 time limits for all pedal assemblies tested. Therefore, the ambient temperatures required for the possibility of this noncompliance to exist are severe. Even if a vehicle with a disconnected return spring soaked under the necessary harsh conditions for a sufficient time to congeal the residual oil, the potential for the noncompliance to occur would exist for only a short time, because the pedal assembly would warm up quickly with activation of the vehicle heating system.

4. *Condition is Self-correcting*—Durability testing indicates that the condition improves with wear. Bench testing was conducted on five production pedal assemblies with poor
