

Baldwin Hydroelectric Corporation (Baldwin), licensee of the Baldwin Project No. 7962,¹ an extension of time from July 7, 1998, until January 7, 2000 to complete project construction. On July 6, 1998, Trout Unlimited and its New Hampshire and Vermont Councils (Trout Unlimited) moved to intervene in this post-licensing proceeding, and filed a request for rehearing of the order granting the extension.

The Commission entertains motions to intervene in or requests for rehearing of post-licensing proceedings only where the actions at issue involve a substantial or material change in either the plan of project development or the license's terms and conditions, or can adversely affect the rights of property-holders in a manner not contemplated by the license.² Extending the time to finish project construction makes no substantial or material change to the project, nor will it adversely affect any property holder's rights. Therefore Trout Unlimited's motion to intervene is denied and its request for rehearing is rejected.

This notice constitutes final agency action. Requests for rehearing by the Commission of this notice must be filed within 30 days of the date of issuance of this notice, pursuant to 18 CFR 385.713.

Acting Secretary.

Columbia Gas Transmission Corporation; Notice of Request Under Blanket Authorization

July 31, 1998.

Take notice that on July 24, 1998, Columbia Gas Transmission Corporation (Columbia), 12801 Fair Lakes Parkway, Fairfax, Virginia 22030-0146, filed in Docket No. CP98-694-000 a request pursuant to Sections 157.205, and 157.212, of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to modify an existing point of delivery to Washington Gas Light Company (WGL) by constructing certain facilities in Prince William County, Virginia, under Columbia's blanket certificate issued in Docket No. CP83-76-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Columbia requests authorization to modify its Robert Trent Jones point of delivery and provide service under existing rate schedules and within certificated entitlements. Columbia estimates that the proposed volumes will be approximately 20,600 Dth/day. The modification has been requested by WGL to provide additional firm transportation service for residential and commercial customers. WGL has not requested an increase in its total firm entitlements. Therefore, there is no impact on Columbia's existing peak day obligations to its other customers.
