

things as operation and maintenance records, and monitoring records. They must also submit a limited number of reports such as the annual report of exceedances of the emission limits (ongoing compliance status reports), and annual reports of Hazardous Air Pollutant (HAP) emissions control efficiencies. Information is made available to the Regional Administrator of EPA or delegated State authority upon request. Records must be maintained for a minimum of 5 years.

The review of this ICR was conducted by EPA Office of Compliance and included surveying EPA Research Triangle Park, Regional offices and other Federal Agencies with knowledge of this industry for information on possible sources. In addition the first **Federal Register** Notice in 1998 sought information on sources from the public and industry. This is a renewal for a NESHAP rule that has just been promulgated. Under sections 40 CFR 63 Subpart Y, information collection is mandatory. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on March 5, 1998 (43 FR 10870); no comments were received.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 268 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing

and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:**

Owners or operators of new and existing marine tank vessel loading facilities.

**Estimated Number of Respondents:**

105.

**Frequency of Response:** Occasionally.

**Estimated Total Annual Hour Burden:** 28,131.

**Estimated Total Annualized Cost Burden:** 0.

This amount, 28,131 hours, are the annual hours for annual leak checks, vapor tightness tests, record keeping on the findings, and for annual reports on excess emissions, compliance status, and the annual Hazardous Air Pollutant control report.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1679.03 and OMB Control No. 2060-0289 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460;

and  
Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: August 5, 1998.

### Agency Information Collection Activities: Submission for OMB Review; Comment Request; NESHAP for Beryllium Rocket Motor Firing

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C.

3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: National Emission Standards for Hazardous Air Pollutants for Beryllium Rocket Motor Firing (part 61, subpart D), EPA #1125.02, OMB Control Number being requested. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before September 10, 1998.

**FOR FURTHER INFORMATION CONTACT:** For a copy of the ICR, call Sandy Farmer at EPA, by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download off the Internet at <http://www.epa.gov/icr/icr.htm>, and refer to EPA ICR No. 1125.02.

**SUPPLEMENTARY INFORMATION:**

**Title:** NESHAP for Beryllium Rocket Motor Firing (subpart D) OMB Control Number to be assigned, EPA ICR Number 1125.02. This is a request for reinstatement of a previously approved collection.

**Abstract:** The purpose of this rule is to control emissions of beryllium from beryllium rocket motor firing, through the controlled firing of the rockets and containment of the beryllium. Beryllium is a hazardous air pollutant and the standards rely on the capture and reduction of beryllium emissions or controlled firing so that a minimum ambient air standard is met.

Notifications from the source inform the EPA when a rocket motor firing is planned. Inspections and test reports allow the agency to check compliance with the standards. The information generated by monitoring, record keeping and reporting is used by the EPA to ensure that the facility affected continues to operate in accordance with the standards.

This is a reinstatement of a NESHAP rule that had previous lapsed. Under sections 40 CFR 61.40 TO 61.44, information collection is mandatory. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 3/5/97 (43 FR 10039); no comments were received.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 3 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Test site operators of Beryllium Rocket Motor Fuel Firings.

**Estimated Number of Respondents:** 1.

**Frequency of Response:** once per test firing in 3 years. (1/3).

**Estimated Total Annual Hour Burden:** 8.33 hours/year.

**Estimated Total Annualized Cost Burden:** 0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1125.02 in any correspondence.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-6141-7]

### Agency Information Collection Activities: Submission for OMB Review; Comment Request; Regulation of Fuels and Fuel Additives, Gasoline Volatility Rule

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Regulation of Fuels and Fuel Additives, Gasoline Volatility Rule; OMB Control Number 2060-0178, expiration date 8/31/98. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before September 10, 1998.

**FOR FURTHER INFORMATION CONTACT:** For a copy of the ICR, call Sandy Farmer at EPA, by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download off the Internet at <http://www.epa.gov/icr/icr.htm>, and refer to EPA ICR No. 1367.05.

#### SUPPLEMENTARY INFORMATION:

**Title:** Regulation of Fuels and Fuel Additives, Gasoline Volatility Rule, OMB Control Number 2060-0178, EPA ICR Number 1367.05, expiration date 8/31/98. This is a request for extension of a currently approved collection.

**Abstract:** Section 211(h) of the Clean Air Act (Act), 42 U.S.C. 7545(h), required the Administrator to promulgate regulations prohibiting the supply or sale of gasoline exceeding certain volatility standards during the high ozone season. The Act provides that for gasoline blends containing 10% ethanol the Reid Vapor Pressure (RVP) may be one pound per square inch (psi) greater than the applicable RVP standard for gasoline not containing 10% ethanol. Parties receiving gasoline (e.g., retailers), must know whether the gasoline contains ethanol. Otherwise gasoline not containing ethanol may be

commingled with gasoline containing ethanol, resulting in gasoline exceeding the applicable non-ethanol RVP standard due to the presence of ethanol, but not at the 10% concentration required for the 1 psi exemption, in violation of the Act and regulations. Therefore, EPA requires, at 40 CFR 80.27(d)(3), that the customary business practice (CBP) transfer documents accompanying shipments of gasoline containing ethanol must state that the gasoline contains ethanol and the percentage concentration (by volume) of ethanol. The statement can be in brief code and it can be preprinted or automatically printed. There is no mandatory retention period or maintenance requirement. There is no reporting requirement or periodic recordkeeping requirement. All responses (print the information and submit to transferee of gasoline) are mandatory. EPA has authority to require this information under section 211 of the Act, 42 U.S.C. 7545, section 114 of the Act, 42 U.S.C. 7414 and section 208 of the Act, 42 U.S.C. 7542. Confidentiality of information obtained from parties is protected under 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 2/26/98 (63 FR 9791); May 5, 1998, no comments were received. Therefore, the ICR supporting statement does not summarize comments or EPA's actions taken in response to comments. However, EPA did consult industry persons by telephone and parties contacted indicated the paperwork requirement has virtually no measurable burden for those distributors whose CBP transfer documents are computer printed or pre-printed. Parties who are not automated use a few seconds per transaction to stamp or write their code on the CBP transfer document.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.15 hour per year for all gasoline distributors handling gasoline containing ethanol and the average burden for non automated parties is 0.3 hour per year (and 0 hour per year for automated parties). Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or
