

States or Indian tribe or allottee a share (royalty) of the full value received for the minerals taken from leased lands. We use an automated fiscal accounting system, the Auditing and Financial System (AFS), to account for revenues collected from Federal and Indian leases. In addition to accounting for royalties reported by payors, AFS facilitates the monthly distribution of mineral revenues to State, Indian, and General Treasury accounts; provides royalty accounting and statistical information to States, Indians, and others who have a need for such information; and identifies underreporting and nonreporting so MMS can promptly collect revenues.

AFS is an essential part of an overall effort to improve the management of the nation's mineral resources and to ensure proper collection and accounting for revenues due from lessees removing and processing oil and gas products from Federal or Indian leases. Part of the data base for AFS consists of information collected using the Payor Information Form (PIF), MMS-4025.

PIF is used to record and report data from new producing leases, for updating payor changes, and to notify MMS of the products on which royalties will be paid.

Based upon well data provided by the Bureau of Land Management, MMS developed a well database and, consequently, payors no longer need to report certain well data when submitting the PIF. Also, the Royalty Policy Committee, established by the Secretary, and MMS personnel identified several data elements that are only needed on an exception basis and, therefore, do not need to be routinely reported on the PIF. This program change reduces the reporting burden for this information collection. We estimate that the annual burden associated with this information collection will decrease from the currently-approved 19,197 hours to 17,250 hours. Approximately 23,000 responses will be received annually, and the burden to complete a revised form will decrease from 45 to 40 minutes or 15,333 hours annually. We estimate the recordkeeping burden at 5 minutes per form or 1,917 hours annually.

As a result of this reduction in reporting burden for this information collection, the following information will no longer be required to be reported on the PIF:

### Section III

- Unit/Comm Agreement Data—Tract number/percent
- Well Data—name, formation, API well number, and/or location.

### Section IV

- Buyer/seller/refiner name.
- Gas contract number.
- RIK contract number.
- Company name and code for which an allowance applies.

Date: July 28, 1998.
