

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Health Resources and Services Administration****Agency Information Collection Activities: Proposed Collection: Comment Request**

In compliance with the requirement for opportunity for public comment on proposed data collection projects [section 3506(c)(2)(A) of Title 44, United States Code, as amended by the Paperwork Reduction Act of 1995, Pub. L. 104-13], the Health Resources and Services Administration (HRSA) will publish periodic summaries of proposed projects developed for submission to OMB under the Paperwork Reduction Act of 1995. To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, call the HRSA Reports Clearance Officer at (301) 443-1129.

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Implementation of a Reporting Form to Grantees of the Emergency Medical Services for Children (EMSC) Program—New

The Maternal and Child Health Bureau of HRSA is planning to implement an annual reporting form required of grantees of the Emergency Medical Services for Children (EMSC) program. The purpose of the form is to provide systematic information and data on the activities conducted and the results obtained by EMSC program grantees to meet the overall program goal of reducing child and youth mortality and morbidity sustained as a result of severe illness or trauma. The proposed form will constitute a new reporting requirement for EMSC grantees.

Data from the form will provide quantitative information on the different aspects of the EMSC program, specifically: (a) demographic data/profile of populations served, (b) state

EMSC infrastructure/system development, (c) local infrastructure/system development, and (d) training of EMS staff in pediatric protocols. This form will provide data useful to the states and will enable HRSA to provide data required by Congress under the Government Performance and Results Act of 1993.

The estimated burden on respondents is as follows:

Respondents	Number of respondents	Hours per respondent	Total hour burden
Grantees	50	2	100

Send comments to Susan Queen, Ph.D., HRSA Reports Clearance Officer, Room 14-33, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: August 7, 1998.

Jane Harrison,

Director, Division of Policy Review and Coordination.

[FR Doc. 98-21722 Filed 8-12-98; 8:45 am]

BILLING CODE 4160-15-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Office of Inspector General****Program Exclusions: July 1998**

AGENCY: Office of Inspector General, HHS.

ACTION: Notice of program exclusions.

During the month of July 1998, the HHS Office of Inspector General imposed exclusions in the cases set forth below. When an exclusion is imposed, no program payment is made to anyone for any items or services (other than an emergency item or service not provided in a hospital emergency room) furnished, ordered or prescribed by an excluded party under the Medicare, Medicaid, and all Federal Health Care programs. In addition, no program payment is made to any business or facility, e.g., a hospital, that submits bills for payment for items or services provided by an excluded party. Program beneficiaries remain free to decide for themselves whether they will continue to use the services of an excluded party even though no program payments will be made for items and services provided by that excluded party. The exclusions have national effect and also apply to all Executive Branch procurement and non-procurement programs and activities.

Methods and Compositions for DRM, A Protein with Cell Cycle Regulating Activity

DG Blair, PA Clausen, LZ Topol, M Marx, G Calothy.
Serial No. 60/079,440 filed 26 Mar 98.
Licensing Contact: Joseph Hemby, 301/496-7735 ext. 265.

A novel gene, DRM, has been identified whose regulation and function are linked to the cell cycle and whose over expression as a fusion with Green Fluorescent Protein (GFP) induces cell arrest at the G1/S cell cycle boundary. The expression of DRM is down regulated rapidly in transformed cells, but is highly expressed in certain normal, highly-differentiated cells of the brain, lung and colon. This novel gene may hold promise as (1) a new, early marker for cells about to transform, (2) a means for targeted cancer therapy, (3) a protective agent during chemotherapy, and (4) as a tool for *in vitro* or *in vivo* cell assays. The stabilized fluorescence of the fusion protein of DRM with GFP may be used in diagnostic assays or for basic research.

Tumor Tissue Microarrays For Rapid Molecular Profiling.

J Kononen (NHGRI), SB Leighton (NCRR), O Kallioniemi (NHGRI).
Serial No. 60/075,979 filed 25 Feb 98.
Licensing Contact: John Fahner-Vihtelic, 301/496-7735 ext. 270.

The present application describes a laboratory instrument which procures tiny (< 1 mm) core samples of biological tissue from characteristic regions of interest in paraffin embedded biological tissue blocks. The core samples are placed in a regular array in a new paraffin block creating a tissue array of thousands of selected samples for analysis. This new array block may now be sectioned, creating up to 200 nearly identical slides each containing tiny discs of the original specimens. These slides can be used as starting material for molecular screening, such as for DNA and RNA in situ hybridization as well as immunohistological staining. With this new invention, investigators are provided with a way to construct a tissue array consisting of a much higher number of tissue specimens than previously possible. Also, this new device automates the process of creating arrays and eliminates tedious hand operations while avoiding the prior art problem of extensive damage to the donor blocks. Feasibility of this method and apparatus has been proven and an automated version of the original system is in development. This research has
