POLICY JUSTIFICATIONGreece - STINGER-RMP Block 1 International Missiles

The Government of Greece (GOG) has requested a possible sale of 1,322 STINGER-RMP Block 1 International missiles including 1,286 complete missile rounds without gripstocks and 36 lot acceptance missiles; 188 gripstock control group guided missile launchers; battery coolant units; publications and technical data; support equipment; and other related elements of logistics support. The estimated cost is \$150 million.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the military capabilities of Greece and furthering NATO rationalization, standardization and interoperability.

The proposed sale of STINGER-RMP Block 1 International missiles will greatly improve Greece's defense posture. GOG desires these articles as part of its five year military force modernization program. The missiles will be provided in accordance with, and subject to, the limitation on use and transfer provided for under the Arms Export Control Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question. Greece, which already has STINGER-RMP Block 1 International missiles in its inventory, will have no difficulty absorbing these additional missiles.

The prime contractor will be Raytheon, Tucson, Arizona. One or more proposed offset agreements may be related to this proposed sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Greece.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 98-42

Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act

Annex
Item No. vi

(vi) Sensitivity of Technology:

1. The STINGER Block 1 International missile system, gripstock, hardware, software and documentation contain sensitive technology and are classified Confidential. The guidance section of the missile and tracking head trainer contain highly sensitive technology and are classified Confidential.

2. Missile system hardware and fire unit components contain sensitive/critical technologies. STINGER critical technology is primarily in the area of design and production know-how and not end-items. This sensitive/critical technology is inherent in the hybrid microcircuit assemblies; microprocessors; magnetic and amorphous metals; purification; firmware; printed circuit boards; laser range finder; dual detector assembly; detector filters; automatic text and associated computer software; optical coatings; ultraviolet sensors; semi-conductor detectors; infrared band sensors; compounding and handling of electronic, electro-optic, and optical materials; equipment operating instructions; primary and reserve battery; energetic materials formulation technology; energetic materials fabrication and loading technology; warhead components seeker assembly and the Identification Friend or Foe (IFF) system with Mode 3 capabilities.

3. Information on vulnerability to electronic countermeasures and counter-countermeasures, system performance capabilities and effectiveness, and test data are classified up to Secret.

4. Loss of this hardware and/or data could permit development of information leading to the exploitation of countermeasures. Therefore, if a technologically capable adversary were to obtain these devices, the missile system could be compromised through reverse engineering techniques which could defeat the weapon systems effectiveness.

5. A determination has been made that the Government of Greece can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

JUL 31 1998

Certification Under Section 620C(d)
Of The Foreign Assistance Act of 1961, As Amended

Pursuant to section 620C(d) of the Foreign Assistance Act of 1961, as amended (the Act), Executive Order 12163 (sec. 1-201(a)(13)) and the Secretary of State's memorandum of December 15, 1997, I hereby certify that the furnishing to Greece of one thousand three hundred twenty-two STINGER-RMP Block 1 international missiles, 188 gripstock control group guided missile launchers and related elements of logistics and program support at an estimated cost of \$150 million, is consistent with the principles contained in section 620C(b) of the Act.

This certification will be made part of the notification to the Congress under section 36(b) of the Arms Export Control Act regarding the proposed sale of the above-named articles and services, and is based on the justification accompanying said notification, of which said justification constitutes a full explanation.
