

Reserves encompassing over 41,000 acres. Currently 12,460 acres of occupied habitat exists within the Core Reserves.

Article III, Section B(2) of the Implementation Agreement entered into by the Service, the Agency, and the California Department of Fish and Game (Department) mandates the establishment of the Core Reserves with boundaries as set forth in the Plan. This section of the Implementation Agreement allows the Agency, with written consent of the Service and the Department, to modify through sale, exchange, or otherwise the configuration, size and/or location of the Core Reserves, if in the opinion of the Service and the Department "the revised configurations better address the overall conservation needs of the Stephens' kangaroo rat." Article VI, Section A(2), of the Implementation Agreement also allows minor adjustments to the Plan including "modification to the configuration of a Core Reserve so long as the amount of occupied habitat contained within the Core Reserve is not diminished and so long as the Service and the Department determine, in writing, that the revised configuration better addresses the overall conservation needs of the Stephens' kangaroo rat."

The Agency proposes to adjust acreage in two Core Reserves set forth in the Plan (Lake Mathews/Estelle Mountain and Lake Skinner) pursuant to Article III, Section B(2) and Article VI, Section A(2) of the Implementation Agreement. The purpose of the proposed action is to allow 561 acres of property to be removed from two Core Reserves and replaced with 719 acres of other land with equal or better value to Stephens' kangaroo rat. This minor adjustment will also release from the Core Reserves all remaining private property owners that do not wish to sell their land to the Agency for inclusion in the Core Reserves.

The Environmental Assessment analyses the proposed action and the no project alternatives in detail. In addition, several other alternatives were considered but not advanced for in-depth analysis due to inferior reserve design, unwilling property sellers and economic considerations. These alternatives include different configurations at three Core Reserves: Lake Mathews/Estelle Mountain, Lake Skinner, and San Jacinto Wildlife.

This notice is provided pursuant to section 10 of the Act and the National Environmental Policy Act regulations (40 CFR 1506.6). The Service will evaluate the proposed minor adjustment to the Plan and comments submitted

thereon. If it is determined that the requirements are met, the Plan will be amended. The final determinations will be made no sooner than 30 days from the date of this notice.

Dated: August 18, 1998.
