

revenues needed for the next rate period.

The FY 1998 PRS indicates the need for an annual revenue decrease of 0.2 percent. As has been the case since the existing rates were approved, the FY 1998 rate adjustment needed falls within Southwestern's plus-or-minus two percent Rate Adjustment Threshold and would normally be deferred. However, the existing rates expire on September 30, 1998. Consequently, Southwestern proposes to extend the existing rates for a one-year period ending September 30, 1999, on an interim basis under the implementation authorities noted in 10 CFR 903.22(h) and 903.23(a)(3). Southwestern continues to make significant progress toward repayment of the Federal investment in the Sam Rayburn Dam Project. Through FY 1997, status of repayment for the Sam Rayburn Dam Project was \$12,156,954, which represents approximately 47 percent of the \$25,676,015 Federal investment. The status has increased almost 31.7 percent since the existing rates were placed in effect.

Information regarding this rate extension, including studies and other supporting material, is available for public review and comment in the offices of Southwestern Power Administration, Suite 1400, One West Third Street, Tulsa, Oklahoma 74103.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby extend on an interim basis, for the period of one year, effective October 1, 1998, the current FERC-approved Sam Rayburn Dam Project Rate for the sale of power and energy.

Dated: August 14, 1998.

Elizabeth A. Moler,
Deputy Secretary.
