

III. Deletion Procedures

Upon determination that at least one of the criteria described in § 300.425(e) has been met, U.S. EPA may formally begin deletion procedures once the State has concurred. This **Federal Register** document, and a concurrent notice in the local newspaper in the vicinity of the Site, announce the initiation of a 30-day comment period. The public is asked to comment on U.S. EPA's intention to delete the Site from the NPL. All critical documents needed to evaluate U.S. EPA's decision are included in the information repository and the deletion docket.

Upon completion of the public comment period, if necessary, the U.S. EPA Regional Office will prepare a Responsiveness Summary to evaluate and address comments that were received. The public is welcome to contact the U.S. EPA Region V Office to obtain a copy of this responsiveness summary, if one is prepared. If U.S. EPA then determines that the deletion from the NPL is appropriate, final notice of deletion will be published in the **Federal Register**.

IV. Basis for Intended Site Deletion

The Coshocton City Landfill was built on an abandoned coal strip mine and is a 28 acre landfill in Franklin Township, Coshocton County, Ohio, 3.5 miles southeast of the City of Coshocton, Ohio. Much of the land to the south and to the west of the site has been mined and reclaimed.

The Coshocton Landfill is located between two small intermittent creeks that drain toward the southwest into the Muskingum River, 1.5 miles west of the site. Active, abandoned, and reclaimed coal strip mines are scattered throughout the region. In 1968, the City of Coshocton purchased the landfill property and used the Site for disposal of municipal and industrial wastes. Disposal ceased in 1979 and the landfill was closed.

The first set of expanded samples collected from existing monitoring wells in 1982 indicated the presence of VOCs in the ground water near the Site. Subsequent sampling confirmed the presence of VOCs in the groundwater.

The Coshocton Landfill Site was releasing contaminants to the environment. The major release mechanism was leachate migrating to surface water. However, the extent of the leachate's migration to groundwater was unclear. Results of samples taken from leachate, groundwater, surface water, and sediment water, and sediment identified approximately 30 chemical constituents.

In September 1983, the Site was placed on the U.S. EPA's National Priorities List (NPL) (48 FR 175). On March 30, 1984, U. S. EPA issued a unilateral administrative order to the City of Coshocton requiring it to undertake some interim measures, primarily to protect surface water and to address the leachate being generated. Approximately six months later, U.S. EPA determined that the City's proposal complied with the terms of the order, and by letter dated April 16, 1986, U. S. EPA agreed to relieve the City of its obligation to perform quarterly sampling.

The Remedial Investigation (RI) and Feasibility Study (FS) were released for public comment on February 8, 1988. The comment period was extended twice and closed on March 17, 1988. A public meeting was held on February 23, 1988. A presentation on the RI and FS was made and then a question and answer session, as well as an opportunity for making public comments, was held. Public comments were also submitted to U. S. EPA by mail. A Responsiveness Summary to these comments was compiled.

The Record of Decision (ROD) was signed by U. S. EPA on June 17, 1988. The Record of Decision (ROD) called for the construction of a landfill cap; regrading; revegetation; and groundwater, surface water, and landfill gas monitoring. In addition, future land-use restrictions were to be placed on the property. The groundwater, surface water and landfill gas monitoring was to be used to determine the necessity of installing a leachate collection and treatment system, and a landfill gas collection and venting system. It was determined during the Remedial Design that it was not necessary to install a leachate collection system or a gas venting system. If a residence is documented to be within 1,000 feet of the landfill, then the ROD called for the preparation and submittal of an explosive gas monitoring plan to U.S. EPA and Ohio EPA (OEPA) within 90 days of the site inspection noting the presence of the residence. An explosive gas monitoring plan was not prepared because there weren't any residences within 1,000 feet of the landfill.

Six potentially responsible parties signed a remedial design/remedial action (RD/RA) consent decree with U.S. EPA to implement the response activities determined to be necessary in the 1988 ROD. The RD/RA was entered by the Court on July 22, 1991, after a thirty-day public comment period, and after the filing of certain objections by Pretty Products, Inc, a potentially responsible party which did not sign the

RD/RA consent decree. The RD/RA Settling Defendants consisted of the following parties: the City of Coshocton, Ohio; General Electric Company; Steel Ceilings Division of Airtex Corporation; Stone Container Corporation; Excello, Inc.; Edmont-Wilson, Inc., a/k/a Becton Dickinson and Company; Buckeye Fabric Finishers, Inc.; and Shaw-Barton, Inc. The Settling Defendants completed the response activities required by the RD/RA Consent Decree and the ROD with U.S. EPA and Ohio EPA oversight. Pretty Products, Inc. subsequently entered into a cost recovery settlement with U.S. EPA, for U.S. EPA's unreimbursed past and oversight costs.

On September 25, 1995, the Close Out Report was signed. The Report documented that the response actions were constructed consistent with the approved remedial design, and with the ROD. Groundwater monitoring occurring subsequent to the Close Out Report documented that contaminants were found below the clean-up levels. For this reason, U.S. EPA proposes to delete the Site from the NPL.

U.S. EPA, with concurrence from the State of Ohio, has determined that all Responsible parties or other persons have implemented all appropriate response actions required at the Coshocton Landfill Superfund Site, and no further CERCLA response actions are appropriate in order to provide protection of public health and environment. Therefore, U.S. EPA proposes to delete the Site from the NPL.

[FTR Amendment ____—1998 Edition]

RIN 3090-AG76

Federal Travel Regulation, General and Payment of Expenses Connected With the Death of Certain Employees

AGENCY: Office of Governmentwide Policy, GSA.

ACTION: Proposed rule.

SUMMARY: This proposed rule amends the Federal Travel Regulation (FTR) provisions pertaining to which employees are subject to the FTR rules governing payment of expenses in connection with death of employees or

their immediate family members. This proposed rule sets forth the allowable expenses authorized by 5 U.S.C. 5742 for the preparation and transportation of the remains of a deceased employee, and for the transportation of the immediate family and household goods of a deceased employee, and for the transportation of the remains of a member of the employee's immediate family who dies while residing with the employee outside the continental United States or in transit thereto or therefrom.

DATES: Comments must be received on or before October 26, 1998.

ADDRESSES: Send comments to the General Services Administration, Office of Governmentwide Policy, Office of Transportation and Personal Property, Travel and Transportation Management Policy Division (MTT), 1800 F Street, NW, Washington, DC 20405-0001. Telefax: 202-501-0349. E-mail: sandra.batton@gsa.gov.

FOR FURTHER INFORMATION CONTACT: Technical Information: Sandra Batton, telephone (202) 208-7642. FTR "plain language" format: Internet General Services Administration (GSA), ftrtravel.chat@gsa.gov.

SUPPLEMENTARY INFORMATION: There are significant changes in this proposed rule regarding payment of expenses in connection with the death of employees and their immediate family members. This proposed rule amends FTR parts 300-2 and 300-3 to incorporate FTR chapter 303 changes and implements the Administrator of General Services' authority under 5 U.S.C. 5721-5738 and

5741-5742 to require agencies to pay certain expenses in connection with the death of an employee and/or his/her immediate family member.

This amendment is written in the "plain language" style of regulation writing as a continuation of GSA's effort to make the FTR easier to understand and use. The "plain language" style of regulation writing is a new, simpler to read and understand, question and answer regulatory format. Questions are in the first person, and answers are in the second person. Use of the pronouns "we", "you", and their variants throughout these chapters refer to the agency.

What Are the Significant Changes Proposed?

There are significant changes in the proposed rule as compared to the provisions for payment of death-related expenses currently contained in Chapter 303. The proposed rule:

- (a) Removes the \$250 limit for preparation and transportation of remains to allow payment of actual costs;
 - (b) Removes restrictions concerning the return of baggage;
 - (c) Allows payment or continued payment of relocation expenses of employee's immediate family when the employee dies before completion of relocation; and
 - (d) Requires mandatory payment of allowable death-related expenses.
- GSA has determined that this proposed rule is not a significant regulatory action for the purposes of E.O. 12866 of September 30, 1993. This

proposed rule is not required to be published in the **Federal Register** for notice and comment; therefore, the Regulatory Flexibility Act does not apply. The Paperwork Reduction Act does not apply, because the proposed revisions do not impose recordkeeping or information collection requirements, or the collection of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 501 *et seq.* This proposed rule is also exempt from Congressional review prescribed under 5 U.S.C. 801, since it relates solely to agency management and personnel.
