**SUPPLEMENTARY INFORMATION:** Chapter 19 of the North American Free-Trade Agreement ("Agreement") establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* ("Rules"). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686).

A first Request for Panel Review was filed with the United States Section of the NAFTA Secretariat, pursuant to Article 1904 of the Agreement, on August 17, 1998, requesting panel review of the final antidumping duty administrative review described above.

The Rules provide that:

(a) A Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is September 16, 1998);

(b) A Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is October 1, 1998); and

(c) The panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and

substantive defenses raised in the panel review.

### Authority

Permits are requested under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing ESA-listed fish and wildlife permits (50 CFR parts 217-227).

The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. ### New Application Received

COE (1176) has requested a 1-year permit to use hatchery bred shortnose sturgeon, (*Acipenser brevirostrum*), to test the potential impacts of deepening Wilmington harbor in North Carolina. The applicant proposes to place hatchery raised sturgeon in wire cages below the surface and subject them to a series of tests blasts to determine the effect that the harbor deepening will have on wild sturgeon in the harbor. During the test blasting, additional protective measures will be taken to prevent wild sturgeon from being affected - these measures include: relocation of any wild sturgeon found to be in the area prior to the blasts and air bubble curtains. Due to contract awards schedule, the test blast schedule would likely begin in December of 1998 and may continue through January, 1999.

### Modification Request Received

USGS requests a modification to permit #944, which would grant permission to relocate endangered shortnose sturgeon located below Holyoke Dam, Massachusetts, above the dam and to modify the technique currently being used for tagging shortnose sturgeon to an IE tag placed internally with the antennae extending through the body wall.
