

previous years have spawned successfully and that the Corps' transportation program appears to have maintained and potentially increased levels of coho salmon natural production in the Elk Creek Basin. ESA-listed adult fish are proposed to be captured at a weir below the dam, anesthetized, transported above the dam, allowed to recover from the anesthetic, and released. In addition to transporting the ESA-listed adult fish, the Corps proposes to tag the fish with opercule punches to estimate the number of fish that pass downstream over the weir and are then captured a second time. ESA-listed adult fish indirect mortalities associated with the transportation program are requested. The Corps also requests that ODFW be authorized to act as an agent of the Corps under the permit.

Those individuals requesting a hearing on the permit application should set out the specific reasons why a hearing would be appropriate (see ADDRESSES). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the above application summary are those of the applicant and do not necessarily reflect the views of NMFS.

#### Preparation of a Final Programmatic Environmental Assessment for the Air Drop Target System Program

**AGENCY:** Ballistic Missile Defense Organization (BMDO).

**ACTION:** Notice of Availability (NOA).

**SUMMARY:** This notifies the public that BMDO is issuing a Final Programmatic Environmental Assessment (PEA) for the Air Drop Target System Program. The PEA assesses the potential impacts associated with technology and deployment activities of the program. The proposed action is to provide the capability to produce, deploy, and maintain the Air Drop Target System. The Air Drop Target System program would provide a realistic target for current and evolving interceptor programs. The Air Drop Target System program would provide a highly flexible, short-range target system allowing multi-shot engagements with high azimuth variability. The Air Drop Target System would provide an air launch target delivery system using standard C-130 cargo aircraft, rather a fixed land-based site.

*Lead Agency:* Ballistic Missile Defense Organization.

*Proposed Action:* The BMDO proposes to provide the capability to produce, deploy, and maintain the Air Drop Target System. The Air Drop Target System program would provide a realistic target for current and evolving interceptor programs.

*Findings:* It has been determined, after consideration of all factors presented in the PEA and pertinent environmental legislation, that, provided the mitigation measures discussed in the PEA are implemented and future site-specific

analysis be performed, the action would not be anticipated to significantly affect the quality of the human environment, and there would be no significant environmental effects associated with this action. For the foregoing reasons, a Finding of No Significant Impact (FNSI) is appropriate, and an environmental impact statement will not be prepared.

**ADDRESSES:** Forward comments and recommendations on the FNSI and PEA to Mr. Crate J. Spears, Room 1E1081, Ballistic Missile Defense Organization, 7100 Defense Pentagon, Washington, DC 20301-7100.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the FNSI and PEA or to obtain a copy of the FNSI or PEA, please write to the above address, or call Mr. Crate J. Spears at 703-604-3893.
