Abstract: The U.S. Department of
Education has been working with State
Directors of adult education and local
providers to document the learning
gains of adult education participants.
Because little is known about the
effectiveness of adult basic education
(ABE) programs for first-level learners,
this is an exploratory study. Hence, we
are developing measures to describe the
operational and instructional
characteristics of ABE programs and are
testing methods of measuring outcomes.
The programs participating in the study
were selected based on information
collected in previous case studies that
had evidence of good instruction, where
teachers had been trained in a specific
model for delivering adult education
instruction, and where there was
evidence of effective program
operations. Respondents are program
participants who voluntarily enroll in
federally funded adult basic education
classes.
