SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those which operate primary aluminum smelters.

Title: Reporting Requirements Under EPA's Voluntary Aluminum Industrial Partnership—EPA ICR No. 1867.01.

Abstract: In April 1993, President Clinton issued the Climate Change Action Plan, which establishes the nation's commitment to returning U.S. greenhouse gas emissions to their 1990 levels by the year 2000. EPA's Voluntary Aluminum Industrial Partnership (VAIP) is an important voluntary program contributing to the overall reduction in greenhouse gas emissions. This program focuses on reducing perfluorocarbon (PFC) emissions from aluminum smelting operations. The twelve companies that have joined the VAIP have cumulatively committed to reduce their PFC emissions 45 percent from 1990 levels by the year 2000. PFCs are very potent greenhouse gases that are persistent in the atmosphere and have a high global warming potential. The VAIP, along with ENERGY STAR Buildings and Green Lights, ENERGY STAR Labeling, and other EPA Programs is a voluntary program aimed at preventing pollution rather than controlling it after its creation. All of these programs focus on greenhouse gas emissions.

EPA has developed this ICR to obtain authorization to collect information from companies participating in the VAIP. Companies that join the VAIP voluntarily agree to the following: designating a VAIP liaison; undertaking technically feasible and cost-effective actions to reduce PFC emissions; and reporting to EPA, on an annual basis, the success of such actions. The information contained in the annual reports of the companies that join the VAIP may be considered confidential business information and is maintained as such. EPA uses the data obtained from the companies to assess the success of the program in achieving its goals.

An agency may not conduct or sponsor, and a person is not required to

respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The projected hour burden for this collection of information is as follows:

Average annual reporting burden = 321.13 hours

Average annual recordkeeping burden: 0 hours

Average burden hours/response: 248.5 hours for an MOU (one-time burden); 56.5 hours for the annual Tracking Report; and 16.13 hours associated with additional activities.

Frequency of response = One per respondent per year

Estimated number of respondents = 12

Cost burden to respondents: Estimated total annualized cost burden: \$226,398

Total labor cost: \$142,347

Total capital and start-up costs: \$0

Estimated total operation and maintenance costs: \$0

Purchase of services cost: \$84,051

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able

to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: September 4, 1998.

Jeanne Briskin,

Branch Chief, Energy Star Programs.

Protection of Stratospheric Ozone: Notice of Revocation of Refrigerant Reclamation Organizations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of revocation.

SUMMARY: Through this action, EPA is announcing the revocation of certification of American Reclamation (located in Chicopee, MA; Ambridge, PA; and Franklinville, NJ) to reclaim refrigerant in accordance with the regulations promulgated at 40 CFR part 82, subpart F. This refrigerant reclaimers was issued a letter of revocation on August 19, 1998, that included an explanation of the basis for EPA's decision. This action also acknowledges the voluntary withdrawal of five previously certified reclaimers. Reclaimers requesting to be removed from the list of EPA-certified reclaimers include Cryodyne Technologies (located in Chester, CT), Eco-Dyne of Utah (located in Salt Lake City, UT), Golden Refrigerant of Florida (located in Punta Gorda, FL), Pacific Coast Trane Service (located in Sunnyvale, CA), Waldrop Heating and Air-Conditioning (located in Spartanburg, SC).

American Reclamation has not complied with the requirements established for refrigerant reclaimers pursuant to section 608 of the Clean Air Act Amendments (the Act). In accordance with those requirements, all certified refrigerant reclaimers must maintain records regarding the amount of refrigerant processed and submit a report of the reclamation activities to EPA on an annual basis. Failure to comply with any of the requirements of 40 CFR part 82, subpart F, including the recordkeeping and reporting requirements, may result in revocation of certification.

EPA sent American Reclamation an information collection request issued pursuant to section 114(a) of the Act, in which EPA requested that this reclaimer

submit the required annual report regarding reclamation activities. The section 114 request letter sent to American Reclamation Services, Franklinville, NJ was returned to EPA unopened. Subsequent attempts by EPA to contact American Reclamation at all locations by other means were unsuccessful. To date, this reclaimer has not submitted an annual report regarding reclamation activity for calendar year 1997. Therefore, American Reclamation is out of compliance with 40 CFR 82.166(h).

In accordance with 40 CFR 82.154(h), class I or class II substances that consist in whole or in part of used refrigerant and that are reclaimed after August 19, 1998, by these six reclaimers are prohibited from being sold or offered for sale for use as a refrigerant. However, refrigerant reclaimed as defined at 40 CFR 82.152 by these reclaimers during the period the reclaimers were certified may be sold and offered for sale.

DATES: American Reclamation had its certification as refrigerant reclaimer revoked, effective August 19, 1998.

FOR FURTHER INFORMATION CONTACT: Jake Johns, Program Implementation Branch, Stratospheric Protection Division, Office of Atmospheric Programs, Office of Air and Radiation (6205-J), 401 M Street, SW., Washington, DC 20460, 202-564-9870. The Stratospheric Ozone Information Hotline at 800-296-1996 can also be contacted for further information.

Dated: September 1, 1998.

Paul M. Stolpman,

Director, Office Of Atmospheric Programs.
