

single doses of potassium perchlorate caused the release of iodide from the thyroids of patients with Graves' Disease. The provisional RfD values did not undergo internal Agency or external peer review. In March of 1997 a peer review panel convened by an independent organization, Toxicology Excellence for Risk Assessment (TERA), determined that the health effects and toxicity data for perchlorate were insufficient to generate a credible RfD for risk assessment purposes. The reviewers were concerned that developmental toxicity, notably neurological development due to hypothyroidism during pregnancy, could be a critical effect of perchlorate that has not been adequately examined in studies to date. They also concluded that insufficient data were available on potential effects of perchlorate on organs and tissues other than the thyroid.

#### New Health Effects/Toxicology Studies Underway

A set of toxicological and ecological studies is underway to address key data gaps and provide a comprehensive database related to the toxicity of perchlorate. The studies are being funded and overseen by a variety of organizations with potential responsibility for perchlorate contamination in the environment including the United States Air Force, the National Aeronautics and Space Administration and the Perchlorate Study Group (PSG).<sup>1</sup>

To date, a 90-day subchronic oral study, a neurobehavioral developmental toxicity study, and a genotoxicity study have been completed. Currently ongoing studies include a segment II developmental toxicity study, a two-generation reproductive toxicity study, absorption, distribution, metabolism, and elimination (ADME) studies, perchlorate mechanistic studies, and immunotoxicity studies. Ecotoxicity studies in *Daphnia*, earthworms, lettuce and fathead minnow are also being performed. The results of most of these studies will be available for discussion in the Toxicological Review document and for development of the revised RfD, cancer, and ecological assessment for perchlorate.

The peer review will focus on the scientific data, methods, and analyses, along with the assumptions and

uncertainties that are associated with the revised provisional RfD, cancer assessment, and ecological assessment for perchlorate. Following the peer review workshop, RTI will issue a report summarizing the workshop. EPA will consider the results of the workshop prior to issuing the revised Toxicological Review document for perchlorate. Although the completed risk assessment will be one of the factors considered in making future decisions regarding perchlorate contamination in the environment, these decisions and other risk management issues will not be a part of the peer review process.

## FEDERAL TRADE COMMISSION

### Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.
