The meeting will begin at 9:00 a.m. on October 30, and is open to the public. The agenda topic is the peer review of draft Technical Reports of long-term toxicology and carcinogenesis studies from the National Toxicology Program.

Tentatively scheduled to be peer reviewed on October 30 are draft Technical Reports of five two-year studies, listed alphabetically, along with supporting information in the attached table. The draft Report on triethanolamine had been peer reviewed previously but is being returned for rereview as this was the first study in which infection of B6C3F₁ mice with *Halicobacter hepaticus* was discovered. All studies were done using Fischer 344 rats and B6C3F₁ mice. The order of review is given in the far right column of the table. By September 30, 1998, full copies of these draft reports will be available for free on the Internet for public review and comment through the Environmental Health Information Service (EHIS) at <http://ehis.niehs.nih.gov>. Printed copies can be

obtained, as available, from: Central Data Management, MD E1-02, P.O. Box 12233, Research Triangle Park, NC 27709 (919/541-3419), FAX (919/541-3687); email: CDM@niehs.nih.gov.

The Program would welcome receiving toxicology and carcinogenesis information from completed, ongoing, or planned studies by others, as well as current production data, human exposure information, and use patterns for any of the chemicals listed in this announcement. Please contact Central Data Management at the address given above, and they will relay the information to the appropriate staff scientist.

The Executive Secretary, Dr. Larry G. Hart, P.O. Box 12233, Research Triangle Park, North Carolina 27709 will furnish agenda and a roster of Subcommittee members prior to the meeting. Summary minutes subsequent to the meeting will be available upon request to Central Data Management.
