

**NATIONAL AERONAUTICS AND SPACE ADMINISTRATION**

[Notice 98-130]

**NASA Advisory Council (NAC), Aeronautics and Space Transportation Technology Advisory Committee (ASTTAC); Airframe Systems Subcommittee; Meeting****AGENCY:** National Aeronautics and Space Administration.**ACTION:** Notice of meeting.

**SUMMARY:** In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics and Space Transportation Technology Advisory Committee, Airframe Systems Subcommittee meeting.

**DATES:** Tuesday, October 20, 1998, 8:30 a.m. to 4:30 p.m. and Wednesday, October 21, 1998, 8:30 a.m. to 4:30 p.m., and Thursday, October 22, 1998, 8:30 a.m. to 4:30 p.m.

**ADDRESSES:** National Aeronautics and Space Administration, Langley Research Center, Building 1209, Room 180, Hampton, VA 23681-0001.

**FOR FURTHER INFORMATION CONTACT:** Dr. Darrel Tenney, National Aeronautics and Space Administration, Langley Research Center, Hampton, VA 23681, 757/864-6033.

**SUPPLEMENTARY INFORMATION:** The meeting will be open to the public up to the seating capacity of the room. The agenda for the meeting is as follows:

- Systems Analysis
- Fundamental Concepts and Methods
- Civil Transportation
- High Performance Aircraft
- Advanced Subsonic Technologies
- High Speed Research

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Dated: September 21, 1998.

**Matthew M. Crouch,**  
Advisory Committee Management Officer,  
National Aeronautics and Space  
Administration.

**NATIONAL ARCHIVES AND RECORDS ADMINISTRATION****Records Schedules; Availability and Request for Comments**

**AGENCY:** National Archives and Records Administration, Office of Records Services—Washington, DC.

**ACTION:** Notice of availability of proposed records schedules; request for comments.

**SUMMARY:** The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

**DATES:** Requests for copies must be received in writing on or before November 16, 1998. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

**ADDRESSES:** To request a copy of any records schedule identified in this notice, write to the Life Cycle Management Division (NWML), National Archives and Records Administration (NARA), 8601 Adelphi Road, College Park, MD 20740-6001. Requests also may be transmitted by FAX to 301-713-6852 or by e-mail to records.mgt@arch2.nara.gov.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

**FOR FURTHER INFORMATION CONTACT:** Michael L. Miller, Director, Modern

Records Programs (NWM), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. Telephone: (301)713-7110. E-mail: records.mgt@arch2.nara.gov.

**SUPPLEMENTARY INFORMATION:** Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs the records to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

**Schedules Pending**

1. Department of the Air Force, Agency-wide (N1-AFU-98-1, 2 items, 2

temporary items). Community College of the Air Force course description records, which were previously approved for disposal, and applied science degree program development records. Records include course charts, instruction plans, and other records describing lower-level college courses as well as program objectives, specialty training standards, lists of preferred electives, and related records used to develop lower-level college programs in applied science.

2. Department of the Air Force, Agency-wide (N1-AFU-98-2, 2 items, 2 temporary items). Job safety training records, which document the issuance of personal protective equipment and the briefing and training of personnel on such matters as emergency telephone numbers, safety belt use, manual lifting guidance, and mishap reporting procedures.

3. Department of the Air Force, Agency-wide (N1-AFU-98-3, 3 items, 3 temporary items). Records containing weapons and communications security serial number data, which were previously approved for disposal. They include serial number images identified by National Stock Number, serial number electronic transaction images, and related reports and listings. Proposed revisions reflect a new automated reporting process.

4. Department of Health, Education, and Welfare; Office of Education; Division of International Education; International Education Relations Branch (N1-12-98-1, 3 items, 3 temporary items). Records, dating from 1940 to 1962, of the former International Education Relations Branch relating to UNESCO and the Organization of American States. These records document administrative support for nonfederal organizations.

5. Department of Labor, Bureau of Labor Statistics, Office of Employment and Unemployment Services (N1-257-98-1, 8 items, 7 temporary items). Survey instruments, data files, and other records used in conducting a time use survey of randomly selected respondents to study how to estimate the amount of nonmarket work performed in the United States.

6. Department of the Treasury, General Counsel (N1-56-95-1, 3 items, 3 temporary items). Status Records of Treasury Decisions and Regulations, which are records of the General Counsel's review of proposed regulations. This schedule also reduces the retention period for records relating to proposed legislation, which were previously approved for disposal.

7. Federal Retirement Thrift Investment Board, Office of External

Affairs (N1-474-98-3, 2 items, 2 temporary items). Database extract reports created by the Department of Labor for auditing purposes, which are used by the Board to discover and correct erroneous information in Thrift Savings Plan accounts.

8. General Services Administration (N1-269-98-1, 6 items, 3 temporary items). Schedule covers multiple, unrelated series of older records stored at the Washington National Records Center. Included are subject files of the Abaca Fiber Program, created by the Reconstruction Finance Corporation, ca. 1942-1960 (program records are proposed for permanent retention); administrative records created by the Farm Credit Administration and the War Assets Administration relating to surplus property disposal, ca. 1945-1950; and administrative and fiscal records of the Office of the GSA Comptroller, accumulated during the 1950's.

9. Office of Science and Technology Policy (N1-429-98-1, 5 items, 5 temporary items). Residual and fragmentary records of the defunct National Space Council now in the custody of the Office of Science and Technology Policy. Included are e-mail, word processing, and administrative records as well as backup tapes and e-mail documentation.

Dated: September 24, 1998.

BILLING CODE 7515-01-P

## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-269, 50-270, 50-287]

### **Duke Energy Corporation; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-38, DPR-47, and DPR-55, issued to Duke Energy Corporation (the licensee) for operation of the Oconee Nuclear Station, Units 1, 2, and 3, located in Seneca, South Carolina.

The proposed amendments would incorporate a License Condition that would allow a revision to the Oconee Updated Final Safety Analysis Report that addresses potential plant

conditions that could occur during engineered safeguards functional tests of the emergency electrical system. These tests are planned to be performed on Unit 3, with Unit 3 in the cold shutdown condition, and Units 1 and 2 operating at power. If an actual loss-of-coolant accident with loss of offsite power were to occur on Unit 1 or 2, simultaneously with test initiation on Unit 3, the Emergency Power System would be placed in a condition outside the present design basis. In addition, the requirements of Selected Licensee Commitment 16.5.5, Shutdown Cooling Requirements, will not be met during the tests, when power is intentionally interrupted to the low pressure injection pumps. The tests are scheduled to be performed in November 1998, during the Unit 3 refueling outage. The proposed changes address an unreviewed safety question that requires prior NRC approval before implementation.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated?

No. For this test, the affected unit is Oconee 3 which will be in a post refueling shutdown condition. All safety functions for maintaining safe shutdown of the unit are available. The UFSAR [Updated Final Safety Analysis Report] Loss of Electric Power accident assumes two types of events: (1) Loss of load and (2) Loss of all system and station power. Since Unit 3 will be shutdown during performance of this test, a unit trip cannot occur. Nothing associated with this test will result in a significant increase in the likelihood of a loss of all systems and station power since both Keowee units and the switchyard will remain available. In addition, the gas turbines at Lee Steam station will be available and the SSF
