**Abstract:** All data in this ICR that is recorded and reported is required by 40 CFR part 60, subpart VVV. The monitoring and record keeping requirements include: maintain records of startups, shutdowns, malfunctions, periods where the continuous monitoring system is inoperative (60.7(b)), and of all measurements including performance test measurements, operating parameters of monitoring device results for catalytic or thermal incinerator, carbon adsorption system, condensation system, vapor capture system and/or total enclosure (60.744(c-h); and monitor actual 12-month VOC use and make semi-annual estimate of projected VOC use, if affected facility uses less than 95 Mg/year of VOC or is subject to provisions specified in § 60.742(c)(3) and other information required by this part recorded in a permanent file suitable for inspection. The file shall be retained for at least two years.

Following notification of startup, the reviewing authority might inspect the source to check if the pollution control devices are properly installed and operated. Performance test reports are used by the Agency to discern a source's initial capability to comply with the

emission standard, and note the operating conditions specified above under which compliance was achieved. Data obtained during periodic visits by Agency personnel from records maintained by the respondents are tabulated and published for internal Agency use in compliance and enforcement programs. The semiannual reports are used for problem identification, as a check on source operation and maintenance, and for compliance determinations.

The required information consisting of emissions data and other information have been determined not to be private. However, any information submitted to the agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
