

Big Dry, and Powder River RMPs in Montana; the Dillon MFP in Montana; the North Dakota RMP; and the South Dakota RMP. The fire plan update will help guide future management decisions concerning fire management objectives, wildland fire suppression and rehabilitation, the use of prescribed fire and other fuel management techniques.

DATES: Comments and issues should be submitted by November 30, 1998. The EA is scheduled for release to the public in late 1998 or early 1999.

ADDRESSES: Address all comments concerning this notice to John Thompson, Project Manager, P.O. Box 36800, Billings, MT 59107.

FOR FURTHER INFORMATION CONTACT: John Thompson, 406-255-2852.

SUPPLEMENTARY INFORMATION: The BLM has fire protection responsibility on more than 8 million acres of public land in Montana and the Dakotas. By agreement, the BLM also protects more than 600,000 acres of other federal and state agency lands in eastern Montana while other federal and state agencies protect 1.7 million acres of public lands for the BLM in western Montana. Over the 10-year period between 1987 and 1996, the BLM responded to over 1,500 wildland fires for which BLM had fire protection responsibility. Over 265,000 acres were burned and the fires averaged 176 acres. The largest fire burned an estimated 58,300 acres.

The Fire Management Plans are being updated to comply with the Federal Wildland Fire Management Policy and Program Review, reduce the risk and cost of severe wildland fires, and ensure the ecological health and function of grasslands and forest ecosystems that are fire dependent. As part of these fire plan updates, the BLM will carefully analyze resource objectives, fire management objectives, appropriate response to wildland fires based on consideration of firefighter and public safety, threats to private property, anticipated suppression costs, resource values at risk, resource benefits, and political and social concerns. An environmental analysis will address how fire can be used to help achieve resource objectives identified in land use plans and to reduce dangerous accumulations of fuel especially near populated areas. Where appropriate, the BLM will amend existing RMPs to be consistent with current fire management policy and to better achieve priority resource management objectives.
