ENVIRONMENTAL PROTECTION AGENCY

[FRL–6184–6]

Clean Water Act Section 303(d): Availability of List Submissions and Proposed Decisions

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of an EPA decision identifying water quality limited segments and associated pollutants in California to be listed pursuant to Clean Water Act Section 303(d)(2), and requests public comment. Section 303(d)(2) requires that states submit and EPA approve or disapprove lists of

waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards and for which total maximum daily loads (TMDLs) must be prepared.

EPA partially approved and partially disapproved California's submittal. Specifically, EPA approved California's listing of 472 waters and associated priority rankings. EPA disapproved California's decisions not to list 37 water quality limited segments and associated pollutants, and an additional 12 pollutants for waterbodies already listed by the State. EPA identified these additional waterbodies and pollutants for inclusion on the 1998 Section 303(d) list. EPA also announced its intention to approve the State's listing of Coyote Creek for toxicity pending solicitation of public comments concerning this listing decision.

EPA is providing the public the opportunity to review these proposed decisions as required by Public Participation regulations (40 CFR part 25). EPA will consider public comments in reaching its final decisions on the additional waterbodies and pollutants identified for inclusion on California's final lists.

DATES: Comments must be submitted to EPA on or before December 4, 1998.

ADDRESSES: Comments on the proposed decisions should be sent to David Smith, TMDL Coordinator, Water Division, U.S. Environmental Protection Agency Region IX, 75 Hawthorne Street, San Francisco, CA 94105, telephone (415) 744–2012, facsimile (415) 744–1078. Copies of the proposed decisions concerning California which explain the rationale for EPA's proposed decisions can be obtained by writing or calling Mr. Smith at the above address.

Underlying documentation comprising the record for this decision is available for public inspection at the above address.

FOR FURTHER INFORMATION CONTACT: David Smith at (415) 744–2012.

SUPPLEMENTARY INFORMATION: Section 303(d) of the Clean Water Act (CWA) requires that each state identify those waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards. For those waters, states are required to establish TMDLs according to a priority ranking.

On January 11, 1985, EPA published the Water Quality Planning and Management regulations (50 FR 1775). These regulations included requirements related to the implementation of Section 303(d) of the CWA (40 CFR 130.7). The regulations
