advantage of their existing statutory authority to promulgate and enforce standards and regulations that are responsive to the hazardous conditions identified by the Research Agenda developed by this Task Force. Agency responsiveness to the Agenda, however, depends largely on the means by which participation, coordination, and accountability among the agencies are effected. Revision of agency statutes to authorize specifically the prevention and remediation of take-home contamination, especially through revision of the factors used to establish the prioritization schemes used by EPA and ATSDR, should be considered by Congress only if the agencies find it difficult to respond effectively to the Research Agenda.

Response From the National Institute for Occupational Safety and Health (NIOSH)

NIOSH supports the research agenda proposed by the Workers' Family Protection Task Force in this report. The recommended research priorities fit within the framework of the National Occupational Research Agenda (NORA) and particularly its priority area "Special Populations at Risk." This plan, developed by NIOSH and more than 500 public and private partners and stakeholders, includes priorities for addressing allergic and irritant dermatitis; asthma and chronic obstructive pulmonary disease; fertility and pregnancy abnormalities; infectious diseases; control technology and personal protective equipment; and many other areas highlighted by the Task Force for consideration. NIOSH supports the recommendations of the Task Force and welcomes public comment on the proposed research agenda.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of a guidance document for reviewers entitled "Repeal of Section 507 of the Federal Food, Drug, and Cosmetic Act." Section 125 of title I of the FDAMA (Pub. This guidance document represents the agency's current thinking on the implementation of the repeal of section 507 of the act. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute, regulations, or both.

Interested persons may submit written comments on the guidance document to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document.
