

Commission, Pacific Gas and Electric Company, and several local authorities.

The results of these meetings have allowed Western and CEC to identify areas of concern raised by the public and other agencies. The visual and noise impacts of the plant and the new transmission line were a major concern of the people who live in the immediate area of the plant site. Other more general issues concerned water resources—the impact to nearby wells by a potential draw-down by SPP; water quality impacts to downstream users and fisheries; the use of surface ditches by the project; and potential impacts caused by localized flooding. Other concerns raised include air quality impacts, land use issues, impacts to agricultural operations, and the need for rezoning the site.

The Draft EIS/FSA presents analyses of the no action (no project) alternative, as well as four siting alternatives to the proposed site. These alternate sites were compared to the unmitigated impacts of the SPP proposed location. The potential impacts to each sensitive issue (water, air, natural resources, cultural resources, visual, noise, etc.) were analyzed and discussed in some detail in the Draft EIS/FSA. However, each of these alternate sites were found to have environmental problems. Alternatives to the proposed project, as well as individual mitigation measures, are proposed and applied where impacts approach a threshold of significance. Environmentally preferred options are detailed for each issue.

CEC will hold hearings on Calpine's proposal. These are held as evidentiary hearings with two commissioners present. All witnesses are sworn in and present information to the Commissioners. Each technical area will be discussed in this manner, so that the length of the hearing process depends on the amount of testimony that needs to be taken for each technical area. Following each portion of the hearing process, the public may comment on the evidence presented. A full transcript will be available following the hearings.

A decision on the proposed action will be made after considering comments on the Draft EIS/FSA, both written and those presented at the hearings announced above. The final EIS will present the full analysis of these comments and project alternatives that are proposed in the Draft EIS/FSA and present the final alternative that will be the subject of Western's and CEC's decisions on SPP.

Extension of the Policy on Enforcement of RCRA Section 3004(j) Storage Prohibition at Facilities Generating Mixed Radioactive/Hazardous Waste

AGENCY: Environmental Protection Agency (EPA).

ACTION: Policy statement.

SUMMARY: EPA is announcing a limited extension of its policy (56 FR 42730, August 29, 1991) on the civil enforcement of the storage prohibition in sec. 3004(j) of the Resource Conservation and Recovery Act (RCRA) at facilities that generate "mixed waste" regulated under both the RCRA subtitle C hazardous waste program and the Atomic Energy Act of 1954, as amended (AEA). The policy affects only mixed wastes that are prohibited from land disposal under the RCRA land disposal restrictions (LDR) and for which there are no available options for treatment or disposal. EPA has determined that for a few of these mixed wastes, treatment technology and disposal capacity still is not commercially available. Based on this determination, EPA is hereby renewing for three years the August 1991 policy for those mixed wastes. For purposes of this policy statement, "available treatment technology and disposal capacity" means that a facility is commercially available to treat or dispose of a particular waste and the facility has either (1) a RCRA permit or interim status; (2) a research, development, and demonstration permit under 40 CFR 270.65; or (3) a land treatment permit under 40 CFR 270.63.
