**ADDRESSES:** Public reading copies of the FEIS/GMP will be available for review at the following locations:

Office of the Superintendent, Capitol Reef National Park, Telephone: (435) 425-3791 x101.

Office of Public Affairs, National Park Service, Department of Interior, 18th and C Streets NW, Washington, DC 20240, Telephone: (202) 208-6843.

**SUPPLEMENTARY INFORMATION:** The FEIS/GMP analyzes four alternatives to future direction of park resources management, to adaptive use of the Sleeping Rainbow Ranch, to interpretation of the Fruita Rural Historic District, and to amount of visitor services. Alternative A (preferred) is designed to protect and preserve exceptional resources, the quality of visitor experience, and the wilderness characteristics of certain portions of the park. Alternative B focuses on removing many existing developments to restore and enhance natural and historic resources and the wilderness qualities of the park. Alternative C continues actions identified in the 1982 General Management Plan which emphasizes visitor services and facilities, including development in some backcountry areas. Alternative D, the No Action Plan, would maintain visitor services and resource protection at current limited levels throughout the life of the plan.

The FEIS/GMP in particular evaluates the environmental consequences of the proposed action and the other alternatives on vegetation and wildlife, endangered species, scenic values, archeological and historic resources, visitor services, and economy of adjacent communities.

**AGENCY:** National Park Service, Interior.

This draft environmental assessment, prepared by the National Park Service, deals with the environmental consequences of allowing Portland Borough Authority (PBA) to repair a section of underground waterline which has become exposed by a storm water discharge stream. PBA is requesting permission to access the site, stabilize the eroded channel and re-cover the waterline. Once the line is covered, the channel must be stabilized upstream to where bedrock is exposed; otherwise, downcutting will continue and ultimately expose the line again.

**SUPPLEMENTARY INFORMATION:** PBA operates and maintains a water system that passes through DEWA properties at the southern end of the park in the area of Slateford Farm. The water system services the Borough of Portland. There is the potential for significant damage to this exposed waterline that may result from exposure to the weather, impact damage from flood debris or crushing.

The EA is available for public comment. Any member of the public may file a written comment. Comments should be addressed to the Superintendent, Delaware Water Gap National Recreation Area, River Road, Bushkill, PA 18324.

#### Oil and Gas Management Plan/Environmental Impact Statement, Big Thicket National Preserve, Texas

**AGENCY:** National Park Service, United States Department of the Interior.

**ACTION:** Notice of Intent to Prepare and Oil and Gas Management Plan/Environmental Impact Statement for Big Thicket National Preserve.

**SUMMARY:** In accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, the National Park Service is preparing an Oil and Gas Management Plan/Environmental Impact Statement for Big Thicket National Preserve in Hardin, Jefferson, Liberty, Orange, Tyler, Jasper, and Polk Counties, Texas, and is initiating the scoping process for this document. This statement will be approved by John E. Cook, Intermountain Regional Director, National Park Service.

The Oil and Gas Management Plan/Environmental Impact Statement is needed to

address the issues of how the National Park Service can protect its resources and values, ensure public safety, and minimize conflicts with visitors and park management while recognizing the rights of private mineral owners to develop their oil and gas resources. In the Oil and Gas Management Plan/Environmental Impact Statement and its accompanying public involvement process, the National Park Service will formulate and evaluate the environmental impacts of a reasonable range of alternatives that will provide protection for resources and values at Big Thicket National Preserve while allowing for exploration and development of the private mineral estate. Distinct management issues include identifying which park resources and values are most sensitive to oil and gas exploration and development disturbance, defining impact mitigation requirements to protect such resources and values, establishing reasonable performance standards and providing pertinent information to oil and gas owners and operators that will facilitate operations planning.

**PUBLIC INFORMATION AND COMMENTS:** A public scoping newsletter will be mailed in November 1998, to invite public participation in the scoping process and to describe the planning process. The general public and affected or interested parties are encouraged to provide comments and suggestions, and to identify issues and other reasonable alternatives that should be addressed in the Oil and Gas Management Plan/Environmental Impact Statement.

An Open House meeting will be held on December 3, 1998, at the Beaumont Hilton in Beaumont, Texas. The public and affected or interested parties may request additional meetings in other Texas cities. These requests should be made no later than January 17, 1999.

**FOR FURTHER INFORMATION CONTACT:** If you would like to be placed on the mailing list or request a meeting in your city, please contact Linda Dansby, EIS Team Leader, P.O. Box 728, Santa Fe, New Mexico 87504, 505/988-6095 or Superintendent, Big Thicket National Preserve, at 409/839-2691, ext. 223.
