Title(s): Housing Occupancy Certificate Under the Migrant and Seasonal Agricultural Worker Protection Act.

OMB Number: 1215-0158.

Agency Number(s): WH-520.

Affected Public: Farms; Individuals or households, Businesses or other for-profit.

Total Respondents: 60.

Frequency: On occasion.

Average Time per Response (Reporting): 3 minutes.

Average Time per Response (Recordkeeping): 1 minute.

Estimated Total Burden Hours: 4.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating and maintenance): \$0.

Application for Special Industrial Homemaker's Certificate (WH-2), Application for Authority to Employ Workers with Disabilities at Special Minimum Wages (WH-226-MIS), Supplemental Data Sheet for Application for Authority to Employ Workers with Disabilities at Special Minimum Wages (WH-226a-MIS)

I. Background

The Fair Labor Standards Act (FLSA) authorizes the Secretary of Labor to regulate, restrict, or prohibit industrial homework as necessary to prevent evasion of the minimum wage requirement of the Act. The FLSA also provides that the Secretary of Labor, to the extent necessary in order to prevent curtailment of opportunities for employment, shall provide for the employment of learners at subminimum wage rates. The FLSA also provides for the employment of workers with disabilities at subminimum wages in order to prevent curtailment of employment opportunities for such individuals. The WH-2 is used by employers to obtain certificates to employ individual homeworkers in one of the restricted homework industries: knitted outerwear, women's apparel, jewelry manufacturing, gloves and mittens, button and buckle manufacturing, handkerchief manufacturing, and embroideries. The WH-226 and WH-226a-MIS are used by employers to obtain authorization to employ workers with disabilities in competitive employment, in sheltered workshops, and in hospitals and institutions, at subminimum wages.

II. Current Actions

The Department of Labor seeks an extension of this information collection

in order to carry out its responsibility to make a determination whether to grant or to deny an employer's request for subminimum wage and/or homemaker employment authorization.

Type of Review: Extension.

Worker Information-Terms and Conditions of Employment (WH-516, English and Spanish Versions)

I. Background

Various sections of the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), requires each farm labor contractor, agricultural employer, and agricultural association to disclose in writing the terms and conditions of employment, to migrant and seasonal agricultural workers. Public Law 104-49 provides for the disclosure of certain information regarding State workers' compensation insurance to the employee. The information must be disclosed to workers in writing, but there is no particular format required. The WH-516 is provided as an optional form which a farm labor contractor, agricultural employer, or agricultural association may use to disclose the required information.

II. Current Actions

The Department of Labor seeks the extension of this information collection to carry out its statutory responsibility to ensure that farm labor contractors, agricultural employers and agricultural associations have disclosed to their migrant and seasonal agricultural workers the terms and conditions of employment as required by MSPA and its regulations.

Type of Review: Extension.

Agency: Employment Standards Administration.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. H-372]

RIN: 1218-AB58

Metalworking Fluids Standards Advisory Committee: Notice of Meeting

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Metalworking Fluids Standards Advisory Committee: Notice of meeting.

SUMMARY: The Metalworking Fluids Standards Advisory Committee (MWFSAC), established under Section 7 of the Occupational Safety and Health Act of 1970 to advise the Secretary of

Labor on appropriate actions to protect workers from the hazards associated with occupational exposure to metalworking fluids, will meet in Washington, D.C., on Monday through Wednesday, December 7 through December 9, 1998.

DATES: The meeting will be held December 7, from 10 a.m. to approximately 6 p.m.; on December 8, from 8 a.m. to approximately 5 p.m.; and on December 9, from 9 a.m. to approximately 4 p.m.

ADDRESSES: The Committee will meet at the Governor's House Hotel, 1615 Rhode Island Avenue, NW., Washington, DC 20036. Telephone: (202) 296-2100.

Mail comments, views, or statements in response to this notice to Dr. Peter Infante, U. S. Department of Labor, OSHA, Directorate of Health Standards Programs, Metalworking Fluids Standards Advisory Committee, Room N-3718, 200 Constitution Avenue, NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Bonnie Friedman, Director, Office of Information and Consumer Affairs, OSHA, (202) 693-1999.

SUPPLEMENTARY INFORMATION: All interested persons are invited to attend the public meetings of the Metalworking Fluids Standards Advisory Committee, at the times and location indicated above. Individuals with disabilities wishing to attend should contact Theresa Berry at (202) 693-1999 (Fax: 202-693-1634) no later than November 30, 1998, to obtain appropriate accommodations.

Meeting Agenda

The Committee will discuss the NIOSH small business exposure study, industry profile data, air sampling methods, and cancer studies related to metalworking fluids. In addition, work group reports will include medical surveillance issues.

Public Participation

Written data, views, or comments for consideration by the MWFSAC on the various agenda items listed above may be submitted, preferably with 25 copies, to Dr. Peter Infante at the address provided above. Submissions received by November 27, 1998, will be provided to the members of the Committee. Anyone wishing to make an oral presentation to the Committee on any of the agenda items noted above should notify Dr. Peter Infante at the address listed above. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation. Requests to make oral

presentations to the Committee may be granted if time permits.

Authority: This notice is issued under the authority of sections 6(b)(1) and 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655, 656), the Federal Advisory Committee Act (5 U.S.C. App. 2), and 29 CFR part 1912.

Signed at Washington, DC.

Charles N. Jeffress,

Assistant Secretary of Labor.

BILLING CODE 4510-26-U

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-6622]

Pathfinder Mines Corporation

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final Finding of No Significant Impact Notice of Opportunity for Hearing.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) proposes to amend NRC Source Material License SUA-442 to authorize Pathfinder Mines Corporation (PMC) to reclaim the Shirley Basin uranium mill site located in Carbon County, Wyoming. This license currently authorizes PMC to possess byproduct material in the form of uranium waste tailings generated by the licensee's milling operations at the site. An Environmental Assessment (EA) was performed by the NRC staff in support of its review of PMC's license amendment request, in accordance with the requirements of 10 CFR Part 51. The conclusion of the Environmental Assessment is a Finding of No Significant Impact (FONSI) for the proposed licensing action of approval of a reclamation plan.

SUPPLEMENTARY INFORMATION:

Background

The PMC's Shirley Basin facility is licensed by the NRC under Source Material License SUA-442 to possess byproduct material in the form of uranium waste tailings generated by the licensee's milling operations. Uranium milling started at the Shirley Basin site in 1971, and continued until 1992. A total of 8,564,130 tons of ore was milled using a conventional acid leaching process. The mill has been dismantled, windblown tailings have been retrieved and placed on the tailings pile, and placement of the interim cover to decrease the potential for tailings dispersal and erosion has been completed. Based on its review of

PMC's mill decommissioning plan and its supplemental environmental report, the NRC staff had prepared a supplemental environmental assessment in accordance with the requirements of 10 CFR Part 51, and published in the **Federal Register** on April 3, 1996, the conclusion of the assessment. The conclusion was a FONSI. The current site activities include surface reclamation and continuation of the ground water corrective action program.

PMC submitted a reclamation plan by its letter dated May 22, 1996, and provided additional information by subsequent submittals. The reclamation of the site consists of stabilizing the tailings for at least 1,000 yrs and ensuring that the radon emanation from the tailings pile will not exceed 20 pCi/m²/s. The tailings pile will incorporate excavated materials from other areas that are contaminated above the release limit. The reclamation plan requires consolidation and movement of all the contaminated materials from the processing area to the tailing piles.

Summary of the Environmental Assessment

The NRC staff performed an appraisal of the environmental impacts associated with the reclamation plan for the Shirley Basin site, in accordance with 10 CFR Part 51, Licensing and Regulatory Policy Procedures for Environmental Protection. The license amendment would authorize PMC to stabilize and cover the tailings as proposed. In conducting its appraisal, the NRC staff considered the following information: (1) PMC's 1996 license amendment request, and PMC's subsequent submittals providing additional information; (2) previous environmental evaluations of the facility; (3) data contained in the required environmental monitoring reports; (4) existing license conditions; (5) results of NRC staff site visits and inspections of the facility; and (6) consultations with the U.S. Fish and Wildlife Service, and the Wyoming State Historic Preservation Officer. The technical aspects of the reclamation plan will be discussed separately in a Technical Evaluation Report (TER) that will accompany the final agency licensing action.

The results of the staff's appraisal are documented in an EA placed in the docket file. Based on its review, the NRC staff has concluded that there are no significant environmental impacts associated with the proposed action.

Conclusions

The NRC staff has examined actual and potential impacts associated with
